

# Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Austria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that background! It's great that you're thinking carefully about your next steps — and Denmark offers several excellent options after primary school. Let's break it down so you can consider what fits you best.

## Main educational paths after primary school (folkeskole) in Denmark

Since you've just finished primary school (typically 9th or 10th grade), here are your main choices:

### 1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for university:

- **STX (Alment gymnasium):** Broad academic focus (humanities, science, social science). Good if you enjoy many subjects and want to keep options open.
- **HHX (Handelsskole):** Focus on business, economics, languages. Great if you're interested in trade, marketing, or international business.
- **HTX (Teknisk gymnasium):** Focus on technology, science, and innovation. Ideal if you like tech, IT, engineering.
- **HF (Højere forberedelseksamen):** A 2-year option, often for those who want a more practical/shorter academic path before higher education.

### 2 Erhvervsuddannelser (Vocational education & training)

These combine school and apprenticeship in a company:

- For example: carpenter, electrician, chef, health care assistant, graphic designer, etc.
- Good if you like practical learning and want to enter the job market faster (or continue to *EUX*, which combines vocational training + gymnasium-level courses = both work skills and eligibility for higher education).

### 3 International opportunities

Since you have Austrian roots, you might also consider:

- A Danish international school/IB programme if you're interested in an international diploma.

- A student exchange or a year abroad (e.g. in Austria or elsewhere) to build language skills and cultural experience.

## What to consider when choosing

Ask yourself:

- ✓ What subjects do I enjoy the most?
- ✓ Do I prefer academic study, practical work, or a mix?
- ✓ Do I want to keep the door open for university?
- ✓ Would I like to study or work internationally later?

## Example scenarios

- If you're curious about many subjects and want to keep your options open → **STX**.
- If you love business or dream of working internationally → **HHX** might fit well, especially with your Austrian connection.
- If you enjoy science/tech/innovation → **HTX**.
- If you prefer hands-on work and to get job-ready faster → **vocational training or EUX**.

## Next steps

- 👉 Attend open house events at schools — they usually happen in January-February.
- 👉 Talk to a guidance counselor (uddannelsesvejleder) at your school — they can give personalized advice.
- 👉 Think about combining Danish education with an international dimension (e.g. a semester abroad, or choosing a school with strong language options).

 **If you tell me more about your interests, hobbies, or dream jobs, I can give a more tailored recommendation!** For example: do you like science, art, business, working with people, building things...?

Would you like help exploring specific schools or programmes near where you live?
