

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Austria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting point in your life — congratulations on finishing primary school! Since you're in Denmark and just finished *folkeskole* (or equivalent), you have several good options depending on your interests, learning style, and future plans. Let's break it down:

Typical educational paths after primary school in Denmark

Here's a quick overview of what students often choose:

1 Gymnasiale uddannelser (Upper Secondary Education / General Education Path)

If you want to keep your options open for university, these are good choices:

- **STX (Almen studentereksamen)** – Broad academic focus (sciences, humanities, social studies).
- **HHX (Højere handelseksamen)** – Focus on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, and innovation.
- **HF (Højere forberedelseksamen)** – Shorter (2 years), practical academic focus, good if you want to move toward specific professional programs or university later.

 Best if you like academic subjects and want to leave the door open for university studies.

2 Erhvervsuddannelse (Vocational Education and Training, EUD)

- A mix of school and apprenticeship with a company.
- Leads to a skilled trade (e.g., carpenter, electrician, chef, hairdresser, IT support).
- Great if you prefer learning by doing and want a profession relatively quickly.

 Often 3-5 years depending on the trade.

3 Kombinerede forløb (EUX)

- Combines vocational education with a higher academic level so you can both get a trade and be eligible for university later.
- Ideal if you want hands-on experience but still want access to higher education.

4 International or alternative options

- Since you have Austrian roots, maybe consider international schools (e.g. IB — International Baccalaureate) if you're interested in an international career.
- Some schools in Denmark offer the IB Diploma Programme or other international qualifications.

💡 How to decide?

Ask yourself:

- ✓ Do I enjoy theoretical learning (math, languages, sciences)? → *Consider STX, HTX, HHX, IB*
- ✓ Do I prefer practical, hands-on tasks? → *Consider EUD or EUX*
- ✓ Am I interested in business or technology? → *Consider HHX, HTX, EUX*
- ✓ Do I want flexibility to study in Denmark, Austria, or elsewhere in Europe? → *STX, IB, or EUX could be great*

🌍 Your background

Since you're fluent in Danish but have Austrian roots:

- You could explore a school that offers German as part of their language curriculum if you want to strengthen that connection.
- You might also look at exchange programs or schools that facilitate study options in German-speaking countries later.

★ My recommendation

Since you've just finished primary school and if you're unsure exactly what you want yet:

- 👉 **STX or HTX** could be a great choice to give you broad academic skills, or
- 👉 **EUX** if you're tempted by vocational training but want to keep university as an option.

Next steps

- ✓ Visit the schools in your area — many have *åbent hus* (open house) days where you can learn about programs.
- ✓ Talk to a *UU-vejleder* (youth guidance counselor) — they can help tailor advice to your interests.
- ✓ Think about what subjects or activities you've enjoyed most so far.

If you'd like, I can help you:

- compare specific schools or programs near where you live
- plan for a future where you might study or work in Austria
- explore how different choices lead to specific careers

Would you like help with that? 😊
