

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bahrain. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background — it sounds like you're at an exciting turning point! Since you've just finished **primary school** (in Denmark, this likely means you've completed *folkeskole* or *grundskole* up to 9th or 10th grade), let's explore your options thoughtfully.

Main educational paths after primary school in Denmark

At your age and stage, these are the typical choices:

Gymnasium (STX, HHX, HTX, HF)

Academic upper secondary school (3 years, or 2 years for HF) that prepares you for university.

- **STX (Almen gymnasium)** → General academic subjects (humanities, science, languages, arts).
- **HHX (Handelsskole)** → Business, economics, and international trade.
- **HTX (Teknisk gymnasium)** → Focus on science, technology, and engineering.
- **HF (Højere forberedelseseksamen)** → 2-year general program, often for those who want a shorter academic path or a fresh start.

Erhvervsuddannelse (Vocational education & training, VET)

Combines school and paid apprenticeship. Prepares you for skilled jobs (e.g., carpenter, chef, electrician, IT-support). Many VET programs also allow you to take the *eux* path, which combines vocational training with qualifications for university.

Kombineret ungdomsuddannelse / Produktionsskole / 10th grade

If you want more time to decide or strengthen your skills, you can do an extra year in 10th grade, or a youth training program designed for practical learning and personal development.

How to decide?

Ask yourself:

- Do you enjoy academic subjects (math, literature, history, languages, science)? → Gymnasium could be great.
- Are you more motivated by hands-on work and learning by doing? → Vocational education may suit you.

- Do you have a clear career dream already (doctor, engineer, entrepreneur, chef, mechanic)? → Let that guide your choice.
- Would you like a mix (e.g., VET + *eux*, or HHX if you like business + academics)?

My advice based on your situation

- ✓ Since you're fluent in Danish and already familiar with Danish school culture, you can choose any path without language concerns.
- ✓ If you're unsure what to choose, **STX** or **HTX** are good general options — they keep doors open for university studies later.
- ✓ If you enjoy practical work, or want to enter the workforce faster, **VET with eux** could be a smart path — especially since it also gives access to university.
- ✓ Don't forget: you can also combine education with interests in international culture, languages, or business (perhaps HHX could fit given your family's global background).

Next steps

- 👉 **Visit open house events** at local gymnasiums and vocational schools.
- 👉 **Talk to your school counselor (UU-vejleder)** — they can guide you based on your strengths and interests.
- 👉 **Try a short internship or taster course** (brobygning) — this is common in Denmark and helps a lot.

 If you tell me:

- What subjects you like most
- What you see yourself doing in the future (even just ideas!)
- Whether you prefer practical or academic work

... I can help suggest specific paths or even schools in your area!

Would you like to explore that? 😊
