

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bangladesh. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're thinking carefully about your next steps! Since you're 16 and just finished primary/lower secondary school in Denmark (which I assume means **folkeskolen** including 9th or 10th grade), you have several good options depending on your interests, strengths, and long-term goals.

Let me break down the main educational paths in Denmark and offer some guidance:

🎓 Upper secondary education (ungdomsuddannelser)

These programs typically last 2-4 years and prepare you either for higher education or for entering the workforce.

1 Gymnasiale uddannelser (General upper secondary education)

If you enjoy academic subjects and are considering going to university later:

- **STX (studentereksamen)** – broad academic focus (humanities, natural sciences, social sciences)
- **HHX (højere handelseksamen)** – focus on business, economics, and marketing
- **HTX (højere teknisk eksamen)** – focus on technology, science, and innovation
- **HF (højere forberedelseksamen)** – 2-year general education, often for those who want a more practical or flexible academic path

👉 When to choose this?

- If you like studying and want to keep doors open for university, professions like engineering, medicine, business, law, teaching, etc.
- If you're not sure what you want to be yet — these paths give flexibility.

2 Erhvervsuddannelser (Vocational education and training - VET)

If you want to learn a trade or profession through practical, hands-on work:

- You combine school with apprenticeships in companies (for example: electrician, carpenter, IT supporter, hairdresser, chef, health care worker)

👉 When to choose this?

- If you prefer learning by doing rather than sitting in a classroom all day
- If you want to start earning a salary during training
- If you want a clear route into a job soon after finishing

Other options

- **Kombinerede forløb (combined pathways)** – Some schools offer combined general/vocational education for those unsure.
- **International or bilingual education** – Since you're fluent in Danish, you're well set for standard tracks, but international programmes (like IB) could be an option if you want an international career.

My advice for you

Reflect on what you enjoy and what you're good at.

- Do you like sciences, maths, languages, or creative subjects? STX or HTX could fit.
- Are you business-minded? HHX might suit you.
- Do you prefer practical work over books? Consider vocational education.

 **Visit open house events (åbent hus)** — Most schools and colleges welcome future students to see what life is like there.

 **Talk to a guidance counselor (uddannelsesvejleder)** — Your local *UU-vejleder* can help tailor advice to your situation.

 **Think about your long-term dreams** — If you want to go to university, a general upper secondary education is usually best. If you want to start working earlier, a vocational education is a great path.

Being from a Bangladeshi family

This can be a great strength! You might be fluent in Bangla and Danish, giving you opportunities in international business, diplomacy, translation, or cultural work. It can also give you a unique perspective that's valuable in many fields.

If you'd like, you can tell me:

- What subjects you liked most in school?
- What hobbies or interests you have?
- Whether you want to go to university later?

And I can give more tailored suggestions! 😊
