

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bangladesh. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thank you for sharing that! It's great that you're reflecting thoughtfully on your next step. In Denmark, after finishing **folkeskolen (primary and lower secondary school)** at around age 16, you have several good educational options depending on your interests, strengths, and future goals. Let's look at the main paths:

1 Gymnasiale uddannelser (Upper secondary school / academic path)

If you're interested in **university studies later**, or you enjoy academic subjects, these could suit you:

- **STX (Studentereksamen)** – Broad academic focus (humanities, sciences, social sciences, arts). Good if you like a variety of subjects.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international studies.
- **HTX (Higher Technical Examination)** – Focus on technology, natural sciences, and engineering subjects.
- **HF (Higher Preparatory Examination)** – Shorter program (2 years), often more practical and aimed at adults or those wanting to move faster towards further studies.

Why choose this?

If you enjoy school subjects, want to keep doors open for university, or aren't sure yet what you want to study long-term.

2 Erhvervsuddannelser (Vocational education and training - EUD)

If you prefer **hands-on learning** and want to move towards a profession directly (or combine with higher education later):

- Examples: electrician, carpenter, hairdresser, IT supporter, chef, etc.
- You learn both in school and through paid apprenticeships (praktikplads).

Why choose this?

If you like practical work, want job skills sooner, or prefer learning-by-doing.

3 EUX – A mix of vocational and academic

- Combines **vocational education** with the **possibility of university entry**.
- A good choice if you want a skilled trade but also want the option of further studies later.

☀️ Other factors to consider

- ✓ What subjects do you enjoy most? (math, languages, science, art, business, etc.)
- ✓ Do you prefer academic study or practical, hands-on learning?
- ✓ Do you want to start earning earlier or study longer?
- ✓ Are you interested in working in Denmark or maybe abroad later?

👑 My recommendation

Since you're fluent in Danish, born and raised in Denmark, and at a decision point:

➡️ If you like school subjects and want to keep your options open:

→ Consider **STX**, **HHX**, or **HTX** depending on your interests (science/tech = HTX, business = HHX, broad = STX).

➡️ If you prefer a job-focused path but want the option for university:

→ Consider **EUX** — flexible and powerful!

➡️ If you want to get a profession and start working faster:

→ Look into **EUD** in a field that excites you.

💡 Tip:

It's a great idea to visit open house events (åbent hus) at gymnasiums and vocational schools. Talk to advisors, teachers, and students — they can give you a sense of what fits you best.

If you tell me a bit more — like what subjects you enjoy or what kinds of jobs you find interesting — I can help you narrow it down even further! Want to share? 😊
