

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Barbados. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thanks for sharing that context — it helps a lot in giving you a thoughtful answer! Congratulations on finishing primary school! Since you're 16, I assume you've completed **folkeskole** (or a similar equivalent), and now you're thinking about your upper secondary education options. In Denmark, you have several good paths to consider, depending on your interests, strengths, and what you might want in the future. Let's break it down:

🎓 Main educational paths after primary school in Denmark

Here are the most common choices:

1 Gymnasium (STX)

- General upper secondary education, 3 years
- Focus on academic subjects: humanities, sciences, social sciences
- Prepares you for university
- Great if you're interested in continuing to higher education and want a broad, flexible education

2 Higher Technical Examination (HTX)

- 3 years, focuses on technology, natural sciences, and innovation
- Good if you like science, IT, engineering, or technology
- Also qualifies for university

3 Higher Commercial Examination (HHX)

- 3 years, focuses on business, economics, marketing, and languages
- A good choice if you're interested in business, trade, or international relations
- Also qualifies for higher education, particularly business schools

4 Higher Preparatory Examination (HF)

- 2 years, more practical/compact, with adult learning style
- Often chosen by students who want a shorter upper secondary education or who didn't thrive in traditional school settings
- Qualifies for higher education, though not as broad as STX

5 Vocational education and training (EUD / EUX)

- Combines school and apprenticeship
- Prepares you for a trade (e.g. carpenter, chef, electrician, health care worker)
- **EUX** allows you to combine vocational training with a general upper secondary exam so you can also go to university

What might suit you?

Since you didn't mention a specific interest yet, consider these points:

- ✓ Do you enjoy academic subjects like languages, science, or history? → **STX** or **HTX**
- ✓ Are you interested in technology, engineering, or IT? → **HTX**
- ✓ Are you drawn to business, marketing, or international trade? → **HHX**
- ✓ Do you want a practical job soon but also want to keep university options open? → **EUX**
- ✓ Are you eager to start a trade or craft and don't see yourself in school too long? → **EUD**

Your unique background

Since your family is from Barbados and you're fluent in Danish, maybe international perspectives, languages, or cultural studies could interest you too? HHX (with its international business focus) or STX (with language/humanities streams) could fit well, especially if you ever think of working abroad or in global organizations.

Next steps

 My recommendation:

- **Reflect on your interests** — what subjects excite you most?
- **Visit open house events (orienteringsmøder)** at local schools
- **Talk to a guidance counselor (UU-vejleder)** — they can help map your strengths
- **Consider your long-term dreams:** Do you imagine university? A craft? Business?

If you want, you can tell me more about what subjects you enjoy or what type of future job appeals to you — I can help you narrow it down even more!

Would you like help making a comparison chart or list of schools near you?
