

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belarus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! In Denmark, after finishing *folkeskolen* (primary/lower secondary school), you have several good educational paths to choose from, depending on your interests, strengths, and future goals. Let's break it down so you can reflect on what fits you best.

🎓 Main educational options after primary school

1 Gymnasiale uddannelser (General upper secondary education)

These programs typically last 3 years and prepare you for higher education (university, etc.).

- **STX (Studentereksamen)** – A broad academic program with many subjects (humanities, science, social science).
- **HHX (Higher Commercial Examination)** – Focus on business, economics, and international topics.
- **HTX (Higher Technical Examination)** – Focus on science, technology, and engineering.
- **HF (Higher Preparatory Examination)** – A 2-year general program, often for older students or those who prefer a shorter route to higher education.

👉 Best if: You enjoy academic subjects, want to keep options open for university, and are ready for 2-3 more years of schoolwork.

2 Erhvervsuddannelser (Vocational education and training / VET)

A mix of school and paid apprenticeship (praktik) in a company.

- Examples: Electrician, carpenter, chef, healthcare assistant, IT supporter, etc.
- Duration: 3-5 years depending on the field.

👉 Best if: You want to work with your hands or in a trade, prefer practical learning, and like earning a salary during training.

3 Kombinerede uddannelser (Combination programs)

- **EUX:** A combination of VET + gymnasium level subjects → gives you both a vocational qualification and the right to apply to higher education.
- **10. klasse:** An extra year in school to strengthen your academic skills or explore options.

👉 Best if: You're not sure yet, or want both practical skills and the possibility to go to university.

☀️ What should you consider?

- ✅ **Your interests:** Do you prefer academic studies, practical work, business, technology, creativity?
 - ✅ **Your strengths:** Are you stronger in science, language, math, arts, social studies?
 - ✅ **Your long-term dreams:** Do you want to work with people, machines, nature, business, IT?
 - ✅ **Work style:** Do you enjoy hands-on tasks, or do you prefer reading, writing, and theory?
-

💡 Example scenarios

- If you like technology and science → HTX or EUX technical.
 - If you're interested in business or international trade → HHX or EUX business.
 - If you want to become an engineer, doctor, or lawyer → STX is often the best route.
 - If you like practical learning and want to start working sooner → vocational education (EUD) or EUX.
-

🌱 Special consideration for your background

Since you're fluent in Danish and born here, you have the same opportunities as everyone else. But you might also have unique strengths, like bilingualism or a connection to another culture (Belarusian). This could be valuable in fields like international business, translation, diplomacy, or multicultural work.

If you'd like, tell me:

- What subjects do you enjoy most?
- Do you have a dream job or field?
- Do you prefer practical or academic work?

👉 Then I can help you narrow it down even more! 🚀
