

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belarus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important decision — and it's great that you're taking the time to consider your options carefully! Since you're 16, just finished primary school (I assume you mean *folkeskole* or similar), and are fluent in Danish, you have several good paths ahead. Let's break down your choices and what might suit you depending on your interests, strengths, and future plans.

🎓 Main educational options after primary school in Denmark

Here are the typical paths:

1 Gymnasiale uddannelser (upper secondary education / high school)

These prepare you for higher education (university or professional bachelor). Examples:

- **STX (Alment gymnasium)** – Broad academic program (languages, social studies, natural sciences).
- **HTX (Teknisk gymnasium)** – Focus on technology and natural sciences.
- **HHX (Handelsgymnasium)** – Business, economics, and marketing.
- **HF (Højere Forberedelseseksamen)** – Shorter, more flexible (2 years), good if you want a faster route to higher education.

👉 Good for you if:

- You enjoy academic subjects and want to keep options open for university.
- You're not sure yet what you want to study later but want to qualify for higher education.

2 Erhvervsuddannelse (VET - vocational education and training)

You combine school with practical work (apprenticeships). Examples: carpenter, electrician, hairdresser, IT support, chef, etc.

👉 Good for you if:

- You like hands-on learning.
- You want to start working in a skilled trade after a few years.
- You might still choose to take *eux* (a combination that also gives you access to higher education).

3 Combination programs (EUX)

A mix of vocational training and general upper secondary level — so you get a trade qualification *and*

access to higher education.

👉 Good for you if:

- You want a trade but also want the option to go to university or professional academy later.

💡 Questions to ask yourself

- Do I enjoy school and academic subjects?
- Do I prefer practical, hands-on work?
- Do I already have an idea of what I want to work with in the future?
- How important is it for me to keep my options open for university or higher education?

🌟 My general recommendation

- ✅ If you're unsure and want to keep many doors open → **STX or HTX** might suit you well (STX if you like humanities/social studies; HTX if you like science/technology).
- ✅ If you like business or economics → **HHX**.
- ✅ If you want to get into work faster, or like practical learning → **Erhvervsuddannelse** or **EUX**.
- ✅ If you want a shorter, more focused program → **HF** (often used by those who didn't like folkeskole so much, or who want a faster path).

🌱 Other tips

- Visit *uddannelsesmesse* (education fairs) or open house events (*åbent hus*) at schools — this helps you get a feeling for what fits.
- Talk to an *UU-vejleder* (youth education counselor) — they can help tailor advice to your strengths and interests.
- Think about whether you want to stay in your local area or move to a bigger city — it can influence your school choice.

If you want, tell me:

- 👉 What subjects do you enjoy the most?
- 👉 Do you already have ideas about your dream job?
- 👉 Do you like working with your hands, or do you prefer studying/reading/writing?

I can then help recommend more specifically! 🚀
