

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Belarus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about your background — that's really helpful! It's great that you're thinking carefully about your next step after primary school. Let's break down some options you have in Denmark, considering your situation:

Typical options after primary/lower secondary school (Folkeskole / 9th or 10th grade)

In Denmark, after completing primary school, you generally choose between:

Gymnasiale uddannelser (Upper secondary education / High school level)

These programs prepare you for higher education (university, academy, etc.). Examples:

- **STX (Almen gymnasium)** — broad academic focus (humanities, natural sciences, social sciences).
- **HHX (Handelsgymnasium)** — focus on business, economics, marketing.
- **HTX (Teknisk gymnasium)** — focus on technology, natural science, engineering.
- **HF (Højere forberedelseseksamen)** — 2-year program, more flexible, often chosen by those wanting to finish faster or who didn't go directly from 9th grade.

 *Best if you want to keep many doors open for university studies.*

Erhvervsuddannelse (Vocational education and training / VET)

- Combines school and apprenticeship in a company.
- Examples: carpenter, electrician, chef, hairdresser, IT technician, etc.
- Can also lead to higher vocational programs (erhvervsakademi).

 *Best if you want practical skills and a faster path into the job market.*

Kombinerede muligheder

- **EUX:** Combines vocational education with upper secondary academic courses — you get both a trade qualification and the right to apply to university.

 *Best if you like both practical work and keeping academic options open.*

What to consider when choosing?

- ✓ What subjects interest you most (e.g., science, languages, tech, business, arts)?
- ✓ Do you like academic studies, hands-on work, or a mix?
- ✓ Do you already have a career goal or are you exploring?
- ✓ Do you want to study at university in the future, or start working sooner?

Recommendation based on what you shared

Since you're fluent in Danish and have both Danish and Belarusian cultural background, you have a strong position to choose freely.

- If you are still exploring your interests and want to keep doors open: **STX or HTX** might be ideal.
- If you are interested in business, entrepreneurship, or economics: **HHX** could be exciting.
- If you want to work sooner or like learning by doing: consider **EUX** or a straight **erhvervsuddannelse**.

Tip

- 👉 Visit some open house events (orienteringsaftener) at local schools.
- 👉 Talk to your school counselor (uddannelsesvejleder).
- 👉 Consider your strengths: are you passionate about tech, design, science, business, or practical work?

If you want, tell me more about:

- What subjects you enjoy most?
- Hobbies or career ideas you have?
- Whether you're thinking about university?

Then I can give an even more tailored recommendation! 🚀
