

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Benin. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give you a thoughtful answer! Since you've just finished primary school in Denmark (which typically ends at around age 16 if you include the 9th or 10th grade), you're at a natural decision point. Let's go over some options and factors to consider:

Your educational paths after primary school in Denmark

In Denmark, the main options after primary/lower secondary school (folkeskole) are:

Gymnasiale uddannelser (Upper secondary school – academic)

These programs prepare you for higher education (university or university college). Common types:

- **STX (Almen gymnasium)** – broad general education (languages, science, humanities, social science)
- **HHX (Handelsgymnasium)** – focus on business, economics, and international trade
- **HTX (Teknisk gymnasium)** – focus on technology, science, IT, and engineering subjects
- **HF (Højere forberedelseseksamen)** – a 2-year academic program, often for those who want a more flexible or practical academic path

 Best for: if you like studying a range of subjects or want to go to university later.

Erhvervsuddannelser (Vocational education and training – VET)

- You combine school with practical training (apprenticeship) in a company.
- Many fields: crafts, construction, IT, healthcare, retail, gastronomy, etc.
- You can continue to higher education later (e.g., via erhvervsakademi or professional bachelor programs).

 Best for: if you enjoy learning by doing, want to start working sooner, or have a specific trade or profession in mind.

Kombinationsforløb (e.g. eux)

- Combine vocational training with upper secondary academic studies.

- Allows you to qualify for both a trade and higher education.

✓ Best for: if you want a skilled profession but also want the option for university.

Questions to reflect on

Ask yourself:

- Do I enjoy theoretical learning, or do I prefer practical/hands-on learning?
 - What subjects or activities do I feel passionate about?
 - Do I want to go to university, or do I want to work earlier?
 - What careers inspire me?
 - How do I see myself contributing (e.g., helping people, building things, creating, analyzing)?
-

My recommendation

➡ **If you enjoy academic subjects and might want to go to university:** Consider **STX** for a broad education, or **HTX** if you like science and technology. **HHX** is great if you're drawn to business and trade.

➡ **If you want practical experience with the possibility of higher education later:** Consider **EUX**, so you keep your options open.

➡ **If you know you want to learn a trade and start working sooner:** Go for **Erhvervsuddannelse** in a field that excites you (IT, design, gastronomy, electrical work, etc.).

Final tip

It might help to:

- Visit open house events at schools.
- Talk to a guidance counselor at *Ungdommens Uddannelsesvejledning (UU)*.
- Try out "brobygning" (introductory courses at gymnasium or VET schools) if you're unsure.

If you tell me more about your interests (e.g., favorite subjects, hobbies, dream jobs), I can help you narrow down the best fit! Would you like to share more? 😊
