

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Benin. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me tailor my advice! Since you're 16, have finished primary school in Denmark (likely *folkeskole* or *10. klasse*), and are considering your next step, let's look at the main options available in Denmark, along with factors you might consider:

Main educational paths after primary school in Denmark

Gymnasiale uddannelser (General upper secondary education)

These prepare you for university. Good if you enjoy academic subjects and think you might want to study at university later. Options include:

- **STX (Almen studentereksamen)** – broad academic focus (humanities, sciences, social sciences)
- **HHX (Handelsskolens studentereksamen)** – focus on business, economics, and marketing
- **HTX (Teknisk studentereksamen)** – focus on technology, science, and innovation
- **HF (Højere forberedelseseksamen)** – a 2-year program for students who want a shorter path to higher education, often with a more mature environment

Good fit if:

- You like academic subjects
- You're interested in university later
- You want to keep your options open

Erhvervsuddannelser (Vocational education and training, EUD)

These combine school with practical training (apprenticeships) and prepare you for a trade or profession. You earn while you learn in many programs. Examples: electrician, carpenter, chef, hairdresser, IT support, social and health care assistant.

Good fit if:

- You like learning by doing
- You want to enter the job market faster
- You're drawn to a specific trade or practical work

Kombinerede forløb (EUX)

This combines vocational education (EUD) with subjects at the gymnasial level, so you can both get a trade and qualify for university.

Good fit if:

- You want the security of a trade
- You want to keep the option of higher education open

How to choose?

Here are some guiding questions:

- Do you enjoy academic study (reading, writing, theory)? → Consider STX, HTX, HHX, HF.
- Do you prefer practical tasks, creating things, working hands-on? → Consider EUD or EUX.
- Are you interested in business, technology, or science specifically? → HHX (business), HTX (tech/science).
- Do you want to keep the university option open but also have job skills? → EUX is worth exploring.
- Do you like working with people (e.g. health, social care)? → EUD in social & health or HF with focus on social sciences.

My advice

Since you're fluent in Danish and have completed primary school, you have all options open. I recommend:

- ✓ **Reflect on your interests and strengths** — do you prefer theory or practice?
- ✓ **Talk to a guidance counselor (studievejleder)** — they can help map your choices.
- ✓ **Consider visiting open house events at schools (åbent hus)** — they give a good feel for the environment.

If you want, I can help:

- Create a pros/cons list for specific paths
- Suggest specific schools near where you live
- Explore possible careers related to your interests

 **Would you like to tell me more about what subjects or activities you enjoy? Or what kind of work you can see yourself doing in the future?** That will help me narrow it down even more!
