

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Benin. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting point in your life — well done on finishing primary school! Let's break this down so I can give you a good recommendation. In Denmark, after primary school (folkeskole), you have several educational paths to choose from, depending on your interests, strengths, and future dreams.

Here's a guide to help you think it through:

🎓 General educational options after folkeskole

Since you're 16, you're likely looking at one of these:

1 Gymnasiale uddannelser (Upper secondary education / general education)

If you want to keep your options open for university later:

- **STX (studentereksamen)** – focuses on a broad academic curriculum (humanities, sciences, social sciences)
- **HHX** – business and economics focus
- **HTX** – technology and natural sciences focus
- **HF** – shorter 2-year general education, good if you prefer practical approaches or want to get to higher education faster

2 Erhvervsuddannelser (Vocational education and training, EUD)

If you want to combine school with hands-on work experience and maybe become:

- A carpenter, electrician, chef, social and health care worker, hairdresser, etc.
- You can also later take **EUX**, which mixes vocational training and general education (so you can still go to university).

3 Other options

- **10th grade:** Some choose this to mature academically or personally before deciding.
- **International/IB programs:** If you want an international perspective and you're strong in English.

💡 What to consider

- ✓ **What subjects do you enjoy most?** Science, languages, business, tech, arts?
 - ✓ **How do you like to learn?** Theoretical (reading, writing, exams) or practical (doing, making, working)?
 - ✓ **Do you dream of university later?** Then gymnasiale uddannelser (STX, HHX, HTX, HF) or EUX are better.
 - ✓ **Do you want to start working sooner?** Then EUD might suit you.
-

🌟 My recommendation based on what you've shared

- ➡ Since you're fluent in Danish, born and raised in Denmark, you have full access to all educational paths.
 - ➡ Since you didn't mention a strong preference yet, I suggest **STX or HTX** if you like broad academic learning and want to keep university as an option — or **EUX** if you like practical work but still want to keep your options open.
-

Next steps

- Visit educational fairs (uddannelsesmesser)
 - Go to åbent hus (open house events) at local schools
 - Talk to your school's guidance counselor (studievejleder)
-

If you tell me more about your interests (e.g. "I love science" or "I'm good with my hands" or "I'm interested in business"), I can give a more detailed recommendation! Want to share? 😊
