

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bhutan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next steps! Since you're 16, just finished primary school (in Denmark this likely means *folkeskole* up to 9th or 10th grade), and are fluent in Danish, you have several good options depending on your interests, strengths, and future goals.

Here's a breakdown of the most common educational paths in Denmark after *folkeskole*:

🎓 General Upper Secondary Education (Almen Gymnasiale Uddannelser)

- **STX (Studentereksamen)** — Focus on a broad academic education with many subjects (science, social science, humanities, arts). Good if you're aiming for university afterward.
- **HHX (Higher Commercial Examination)** — Focus on business, economics, marketing. Good for business-related higher education.
- **HTX (Higher Technical Examination)** — Focus on technology, science, and engineering. Good for technical or science university studies.
- **HF (Higher Preparatory Examination)** — A shorter 2-year general upper secondary programme, often for students who want a more practical or flexible academic route.

👉 Choose this if:

- You enjoy academic subjects.
- You are considering going to university.
- You like flexibility to choose among many future studies.

🔧 Vocational Education and Training (Erhvervsuddannelse/EUD)

- Combines school education with apprenticeship/training in a company.
- Leads to qualifications for skilled trades (e.g., electrician, carpenter, chef, hairdresser, healthcare assistant).
- Often includes good job prospects right after graduation.

👉 Choose this if:

- You prefer hands-on learning and practical work.
- You want to enter the workforce sooner.

- You have a clear idea of a trade or profession you're interested in.

Other options

- **EUX** — A combination of vocational training and upper secondary academic education. You get both a vocational qualification *and* the right to apply to university.
- **International programs** — Some schools offer IB (International Baccalaureate) or other international programmes if you're interested in studying in English or abroad later.

How to decide?

 Think about:

- What subjects do you enjoy most? (Math, languages, science, arts, practical work?)
- Do you like schoolwork that is mostly academic, or do you prefer learning by doing?
- Do you think you want to go to university, or would you rather start a career sooner?

 You can also:

- Visit open house events at local gymnasiums or vocational schools.
- Talk to a guidance counselor (*UU-vejleder*) — they can help tailor advice to you.
- Ask family, teachers, or people working in jobs you might like.

Example recommendations

- **If you like school, reading, writing, and want university options:** → STX, HHX, or HTX
- **If you like business and marketing:** → HHX
- **If you like technology and science:** → HTX
- **If you want to work with your hands / in a specific trade:** → EUD or EUX
- **If you want flexibility and aren't sure yet:** → STX or HF

If you'd like, you can tell me more about what subjects or activities you enjoy, and I can help you narrow it down further! Would you like that? 😊
