

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bhutan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important question — and it's great that you're reflecting on your future at this stage! Since you're 16 and have just completed primary school (I assume you mean *folkeskolen* or a similar level), let's look at the typical Danish options and how you might choose among them, based on your interests and goals.

Your main educational paths after primary school in Denmark

1 Gymnasiale uddannelser (General upper secondary education)

These prepare you for higher education (universities, professional colleges):

- **STX (Almen studentereksamen)** – Focus on general academic subjects, wide selection of study lines (science, languages, social sciences, etc.).
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, natural sciences, IT.
- **HF (Højere forberedelseeksamen)** – A 2-year program, often for those who prefer a shorter upper secondary path or are returning to education.

2 Erhvervsuddannelser (Vocational education and training - VET)

If you want to learn a trade and enter the workforce sooner:

- Examples: carpenter, electrician, chef, hairdresser, IT-supporter.
- Combines school with apprenticeships in companies (praktikplads).

3 Kombinerede forløb

- **EUX:** A combination of vocational training and upper secondary education that lets you both get a trade and qualify for higher education.

4 Alternative or international options

- International high schools (if you want more English-language focus).
- Folk high schools (*højskole*) — not formal education, but for personal development.
- Special talent programs (music, sports, art).

How to choose? Some guiding questions

- ✓ What subjects do you enjoy the most? (math, science, languages, social science, art, etc.)
 - ✓ Do you see yourself working with your hands, solving practical problems — or studying at university?
 - ✓ Do you like academic work, or prefer learning by doing?
 - ✓ Are you drawn to business, technology, social issues, creative fields?
 - ✓ Would you like to keep your options open for university?
-

My recommendation (based on what you've shared so far)

Since you're fluent in Danish, born and raised in Denmark, and have just finished primary school:

- If you enjoy academic subjects and want to keep many doors open: **STX** is a solid general choice.
 - If you're interested in business or economics: **HHX**.
 - If you like technology, IT, science: **HTX** could be great.
 - If you prefer practical work and maybe want to earn earlier: **EUD or EUX** — especially EUX, as it keeps higher education as an option.
-

A tip for you

Many schools offer *brobygning* (bridging programs) or *introkurser*, where you can try out different types of education before deciding. I highly recommend signing up for these — they help you get a feel for what fits you.

If you want, tell me:

- What subjects or activities do you enjoy most?
- Do you have any dream jobs in mind?
- Would you prefer to go to university later or work sooner?

Then I can help you narrow it down even more! 😊
