

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bhutan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step—let's break it down together so you can make a well-informed choice. Since you've just finished primary school (which in Denmark typically means *folkeskole* up to 9th or 10th grade), your options depend on your interests, strengths, and long-term goals.

Here's an overview of the main educational paths available in Denmark after primary school, with some recommendations based on different scenarios:

1 Gymnasiale uddannelser (Upper secondary academic education)

If you enjoy academic subjects and might want to study at a university later:

- **STX (Alment gymnasium)** – A broad, general upper secondary education focusing on languages, sciences, and humanities. Good if you want to keep doors open.
- **HHX (Handelsgymnasium)** – Focus on business, economics, and international studies.
- **HTX (Teknisk gymnasium)** – Emphasis on technology, natural sciences, and innovation.
- **HF (Højere forberedelseseksamen)** – A 2-year general upper secondary program, usually for slightly older students or those wanting a shorter path to higher education.

👉 *Recommended if you like school, want to keep university options open, and enjoy subjects like languages, science, or business.*

2 Erhvervsuddannelser (Vocational education and training - VET)

If you prefer practical learning and want to work sooner:

- You combine school periods with apprenticeships in a trade, like carpenter, electrician, chef, social and healthcare assistant, etc.
- You can also choose *EUX*, which combines VET with upper secondary qualifications, so you can go to university later if you want.

👉 *Recommended if you like hands-on work, want to earn while you learn, and have an idea of a specific trade you're interested in.*

3 Other considerations

- If you're not sure yet, you could look into **efterskole** or **10th grade programs**, which can give you more time to decide while gaining experience and developing personally.
 - You might also explore **international or bilingual programs** if you want to strengthen other languages (though you're already fluent in Danish!).
-

How to choose?

Here are a few questions to ask yourself:

- ✓ Do I enjoy academic studies, or do I prefer practical, hands-on work?
 - ✓ Do I have an idea of a job or field I want in the future?
 - ✓ Do I want to keep my options open for university or higher education?
 - ✓ Would I benefit from a year of personal development at an efterskole or similar?
-

My suggestion

Since you're fluent in Danish and have successfully completed primary school in Denmark, you can choose *any* of these paths. If you're unsure and want broad opportunities, **STX or HHX** could be great starting points. If you have a passion for a specific trade or want to work with your hands, **VET or EUX** might suit you well.

If you tell me a bit more about:

- What subjects or activities you enjoy the most
- Whether you think about university later or want to start working earlier
- Any hobbies or interests that might influence your choice

I can help you narrow it down even further! Would you like to share that? 😊
