

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bhutan. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next steps—congratulations on finishing primary school! 🎉 Since you're 16 and have completed primary school in Denmark, you're at an important decision point. Let's break it down so you can choose the path that fits your interests, strengths, and goals.

📌 Main educational paths after primary school in Denmark

After completing *folkeskole* (or equivalent), you typically have a few options:

1 Gymnasiale uddannelser (Upper secondary education - general)

These prepare you for university:

- **STX (Alment gymnasium):** Broad, academic focus—good if you want to keep many options open (humanities, social science, natural science, etc.).
- **HHX (Handelsgymnasium):** Focus on business, economics, marketing.
- **HTX (Teknisk gymnasium):** Focus on technology, natural science, innovation.
- **HF (Højere forberedelseseksamen):** Shorter (2 years), more practice-oriented, often for students who want to go to university or professional colleges but prefer a different style than STX/HHX/HTX.

✅ *Recommended if:*

You enjoy studying, want a wide range of future options, or see yourself going to university or another higher education.

2 Erhvervsuddannelser (Vocational education & training / apprenticeships)

You learn a trade (e.g. carpenter, chef, hairdresser, electrician, IT supporter) and work part-time as an apprentice.

✅ *Recommended if:*

You like hands-on learning, want to start working sooner, or have a clear interest in a specific craft or profession.

3 Kombinerede uddannelser (e.g. EUX)

Combination of vocational training + gymnasial education (so you can both work a trade *and* go to university).

✓ *Recommended if:*

You want practical skills + academic qualification at the same time.

🤔 Questions to ask yourself

To choose the right path:

- Do I prefer academic studies, hands-on work, or a mix?
 - Do I already have a career dream (doctor, engineer, designer, entrepreneur, chef, etc.)?
 - Do I want to keep my options open for now?
 - What subjects do I enjoy most (science, languages, arts, technology, business, etc.)?
-

💡 Example recommendation

Since:

- You're fluent in Danish (that's great—you'll have no language barrier in school).
- You've completed primary school and are deciding now.
- You might still be exploring what you want...

👉 **STX** or **HTX** could be strong choices if you want broad academic options.

👉 **HHX** if you feel drawn to business or international trade (which might also connect nicely to your family's cultural background).

👉 **EUX** if you like both academic and practical skills.

👉 **Vocational training** if you already know you want a specific job or trade.

📝 Next step:

If you'd like, tell me:

- What subjects do you enjoy most?
- Do you already have a career dream?
- Do you prefer classroom learning or more practical, real-world tasks?

I can then give a more tailored suggestion! 🚀
