

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step! Since you're 16, just finished primary/lower secondary school (likely **folkeskole** or similar in Denmark), and are fluent in Danish, you have several good options depending on your interests, strengths, and long-term goals. Let's break it down:

Main educational paths in Denmark after primary school

In Denmark, after 9th or 10th grade, most students choose between:

1 General upper secondary education (Gymnasiale uddannelser)

If you enjoy academic subjects and might want to go to university later.

- **STX** (Almen studentereksamen): Broad, academic focus (languages, science, humanities, social studies)
- **HHX** (Højere handelseksamen): Focus on business, economics, and marketing
- **HTX** (Højere teknisk eksamen): Focus on technology, natural sciences, and innovation
- **HF** (Højere forberedelseksamen): 2-year general education, often for those who took 10th grade or want a shorter route

✓ Good if you like school, want to keep options open for university, and enjoy theory.

2 Vocational education and training (EUD / erhvervsuddannelse)

If you want to combine school with practical training and apprenticeships.

- Learn a trade (e.g. carpenter, electrician, hairdresser, chef, social and health care assistant)
- Mix of school and work at a company

✓ Good if you prefer practical learning, want to earn while you learn, and aim for a job quickly.

3 Combination programmes

- **EUX**: Combines vocational education + general upper secondary → gives you both a trade and the right to enter university.

- **10th grade:** Extra year to improve grades, explore interests, or prepare for upper secondary/vocational path.

☀ Things to consider when choosing

- ✓ **What subjects do you enjoy?** Science? Languages? Art? Technology? Hands-on work?
- ✓ **How do you like to learn?** Do you like reading, writing, and academic work, or do you prefer doing things and learning by trying?
- ✓ **Future dreams?** Do you want to go to university? Start working soon? Start a business?
- ✓ **Cultural connection:** Since you have Bolivian heritage, maybe you'd like an education that includes language (e.g. Spanish), international focus, or opportunities to study abroad?

📝 My suggestion

- 💡 If you want to keep doors open:
- 👉 **STX or HHX** → broad education, lots of options for higher education
- 👉 **EUX** → if you like the idea of a trade + university access
- 💡 If you're eager to start working and like practical tasks:
- 👉 **EUD** → choose a trade that excites you!
- 💡 If you're unsure:
- 👉 Consider **10th grade** → gives you time to think, maybe at an efterskole (boarding school) with focus on e.g. sports, music, design.

🚀 Next step

- 👉 Talk to your school counselor (uddannelsesvejleder)
- 👉 Visit open house events (åbent hus) at schools
- 👉 Explore **ug.dk** — the official guidance site for education in Denmark

If you want, tell me:

- What subjects do you like the most?
- Do you already have ideas about a future job?
- Would you prefer to go to university one day or start working after your next education?

Then I can help you narrow down your options! 😊
