

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bolivia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that's helpful context! Let's break this down thoughtfully so you can consider your options. Since you're 16, finished primary school (I assume *folkeskole* or equivalent), and are fluent in Danish, you're at a key decision point for your youth education (*ungdomsuddannelse*).

Here's an overview of common educational paths in Denmark after primary school, along with some suggestions tailored to your situation:

1 Gymnasiale uddannelser (General upper secondary education)

These are academically focused programs preparing you for university:

- **STX (studentereksamen)** – broad academic focus with many subject combinations.
- **HHX (higher commercial examination)** – focus on business, economics, and languages.
- **HTX (higher technical examination)** – focus on technology, science, and innovation.
- **HF (higher preparatory examination)** – a shorter (2-year) academic path, more practical and flexible.

✓ *Recommended if you enjoy academic subjects, want to keep university options open, or have interests in sciences, languages, business, or technology.*

2 Erhvervsuddannelser (Vocational education and training, EUD)

- Combines school and paid apprenticeships.
- Leads directly to a skilled trade (e.g., carpenter, electrician, chef, hairdresser, social and health worker).

✓ *Recommended if you want to learn a trade, prefer hands-on learning, and would like to start working sooner.*

3 EUX (Combination of vocational and academic)

- Mixes EUD with a gymnasial level education.
- Allows you to qualify for both a trade and further academic study.

✓ Recommended if you want the flexibility of getting a trade and keeping doors open to higher education.

Other possibilities

- **International programs** (e.g., International Baccalaureate) if you're interested in a more global environment.
- **Efterskole or højskole stay** – for personal development and reflection if you're unsure what to choose right away.

How to decide?

Here are some guiding questions for you:

- Do you enjoy academic work, or would you prefer practical/hands-on learning?
- Are there specific subjects or fields that excite you (e.g., science, art, business, technology, languages)?
- Do you want to go to university later, or start working earlier?
- Would you like to explore your Bolivian heritage through language or international studies?

My recommendation

Since you're bilingual and have an international family background, you might find **STX or HHX** attractive — these keep many options open, and you could choose lines with focus on languages, social studies, or economics. Alternatively, if you enjoy building or creating things, **HTX or EUX** could be great choices.

 If you want, I can:

- help you explore specific schools or programs near where you live
- make a comparison chart of the options
- help you think about combining education with interests (e.g., language, technology)

Would you like that? Or can you share a bit about what subjects or activities you enjoy most?
