

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bosnia and Herzegovina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's thoughtful of you to be considering your next steps so carefully! Since you're 16, just finished primary school (in Denmark this usually means **folkeskole** or similar), and are fluent in Danish, you have several good options. Let's break it down.

Main educational paths in Denmark after primary school

Here are the typical options:

1 Gymnasiale uddannelser (Upper secondary education / general education)

If you want to keep your options open for university or higher education, you might consider:

- **STX (Studentereksamen)** – broad academic focus (languages, humanities, science, social science).
- **HHX (Higher Commercial Examination)** – focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – focus on technology, science, engineering.
- **HF (Higher Preparatory Examination)** – shorter (2 years), more flexible, good if you prefer fewer subjects at a time or want to prepare for specific further studies.

✓ Recommended if: you like academic subjects, want to go to university or keep many doors open.

2 Erhvervsuddannelser (Vocational education and training / EUD)

These combine school + apprenticeship (praktik). You can train for trades, crafts, health, service, technology, etc.

✓ Recommended if: you want hands-on learning, faster path to a job, enjoy practical work.

3 Kombinationsuddannelser (EUX)

A mix of vocational training **and** a general upper secondary exam (like STX/HTX level). You can both work after and go to university.

✓ Recommended if: you want a practical skill + option for higher education.

How to choose?

Here are a few questions to ask yourself:

- Do I enjoy academic subjects and studying in a classroom, or do I prefer practical, hands-on work?

- Do I already have an idea what career or field I'm interested in (e.g. business, technology, healthcare, art, trades)?
 - Would I prefer to work sooner or continue in school longer?
-

🌟 Some recommendations based on your situation

Since you're fluent in Danish, and you have both Danish and Bosnian cultural background:

- **If you like school and are considering university later:** STX or HHX (if you're interested in business/economics).
- **If you're interested in technology/science:** HTX could be a great fit.
- **If you like to work practically and get a job sooner:** EUD or EUX (for example in IT, electrician, mechanic, healthcare, or gastronomy).

Also consider:

- 👉 Visit open house events at schools.
 - 👉 Talk to a guidance counselor (vejleder) — they can help based on your interests.
 - 👉 You can often switch paths if you discover a better fit.
-

💡 **Extra tip:** Since you have Bosnian heritage, you might think about how that could be an advantage — e.g. working internationally, in language-related jobs, or fields like diplomacy, trade, or cultural exchange.

If you want, I can help you:

- ✅ Identify specific schools or programs near where you live.
- ✅ Make a pros/cons list for each path.
- ✅ Explore what careers match your interests.

Would you like that? Can you tell me what subjects you enjoy most, or what you dream of doing? 🚀
