

Uddannelsesvejledning for 16-årig

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bosnia and Herzegovina. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing your background—that's helpful context! Let's break this down thoughtfully. Since you're 16 and just finished primary school in Denmark (which typically means **folkeskolen** up to 9th or 10th grade), you're at a key decision point where you choose a youth education (ungdomsuddannelse). The right path depends on **your interests, strengths, and goals**.

Here's an overview of the main options, with suggestions for how you might choose:

1 Gymnasiale uddannelser (General upper secondary education)

These programs prepare you for higher education (university).

- **STX (Alment gymnasium)** – Broad and academic, good if you enjoy subjects like history, languages, natural sciences.
- **HHX (Handelsskolens gymnasium)** – Focus on business, economics, marketing — good if you're interested in commerce or international business.
- **HTX (Teknisk gymnasium)** – Focus on technology, science, IT — great if you like innovation, engineering, or science.
- **HF (Højere forberedelseseksamen)** – 2-year, more practice-oriented, often for students who want a shorter route to higher ed or want to specialize later.

Recommended if:

- You like school subjects, are curious about university later, or aren't sure what field yet.
- You want to keep as many doors open as possible.

2 Erhvervsuddannelser (Vocational education and training - EUD)

These programs combine school and apprenticeship, so you get both theoretical and hands-on experience.

- Fields: carpentry, plumbing, chef, hairdresser, IT technician, social and health care, etc.
- Typically 3-5 years, you finish with a trade qualification.

Recommended if:

- You want to work sooner and learn through doing.

- You're interested in specific skills or crafts.

Kombinationsuddannelser

- **EUX (erhvervsfaglig + gymnasial)** – Combines vocational training with a gymnasial-level qualification. You can work in a trade *or* go to university later.
- Good if you want a balance of hands-on learning and academic options.

 *Recommended if:*

- You want both practical skills and to keep open the possibility of higher education.

How to choose?

Ask yourself:

- **What subjects or activities do I enjoy most?**
- **Do I want a lot of theory and schoolwork, or more practical/hands-on learning?**
- **Do I want to go to university eventually?**
- **Would I like to work with people, technology, business, health, art, etc.?**

Your background

Since you're fluent in Danish and have a multicultural background, you might also think about:

- **International business, diplomacy, or language studies** (if you enjoy cross-cultural topics)
- **Social work, health care, or education** (if you like helping people)
- **STEM fields or trades** (if you enjoy technology, building, or creating)

My advice

 Since you just finished primary school and may want to keep doors open:

 **STX, HHX, HTX, or EUX** could be good paths if you're still figuring things out.

 If you already have a strong interest (e.g. cooking, electrical work, auto tech), consider EUD.

If you want, I can help you:

-  Compare specific programs at schools near where you live.
-  Look at which subjects or trades match your strengths.
-  Plan a path to university, job, or both.

Would you like to tell me:

 What subjects or activities do you like most?

 Are you considering university later, or more interested in working sooner?

Let me know, and I can give you a more tailored recommendation!
