

Uddannelsesvejledning i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Botswana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's awesome that you're already planning your next steps! Let's break it down so I can give you a recommendation that fits your situation in Denmark:

Key factors to consider

- You are **16 years old** — that means you've probably just finished *folkeskolen* (9th or 10th grade).
- You are **fluent in Danish** — so you have access to all types of Danish educational opportunities.
- You have **roots in Botswana** — which could be a source of unique cultural strengths and perspectives.
- You're at a decision point: *Hvilken ungdomsuddannelse passer til dig?*

Main educational options after primary school in Denmark

Here are the typical paths you can consider:

1 Gymnasiale uddannelser (Academic upper secondary programs — if you want to keep doors open for university):

- **STX** (Alment gymnasium): Broad academic subjects (languages, science, humanities). Good if you like a bit of everything.
- **HHX** (Business gymnasium): Focus on business, economics, marketing. Good if you're interested in commerce.
- **HTX** (Technical gymnasium): Focus on technology, natural sciences, IT. Good if you like practical sciences, innovation.
- **HF** (Higher preparatory examination): Shorter 2-year program, often for students who want a more mature or alternative learning environment.

2 Erhvervsuddannelser (Vocational education and training — EUD/EUX)

- Combine learning with practical training in a trade (e.g. electrician, chef, mechanic, childcare, health assistant).
- **EUX** combines vocational training with academic studies — so you can both learn a trade and qualify for university.

💡 How to choose?

Ask yourself:

- ✓ Do I want to go to university later? → **Gymnasiale uddannelser** (STX, HHX, HTX, HF) or **EUX** are good.
- ✓ Am I more interested in hands-on, practical work? → **Erhvervsuddannelse** (EUD) or **EUX**.
- ✓ Do I have a special interest already (e.g. technology, business, art, social work)? → That can guide whether you choose HTX, HHX, STX, or a vocational path.
- ✓ Do I want a broader experience first to explore? → STX is the most general.

🌍 Other things to consider

Since you have a background from Botswana, you could:

- Consider international elements — maybe **study abroad exchanges** or schools with strong international focus (some STX and HHX have international lines or IB — International Baccalaureate).
- Use your multilingual and multicultural background as a strength, especially in programs focusing on language, culture, or international business.

✨ My recommendation

Since you seem thoughtful and open to options:

- ➡ If you're unsure and want to keep doors open → **STX** or **HTX** (if you like science/tech) are safe, broad choices.
- ➡ If you are interested in business or international trade → **HHX**.
- ➡ If you already know you want to work with your hands or in a specific trade → **EUX** or **EUD** could be excellent.

💬 Next step:

If you'd like, tell me:

- What subjects do you enjoy most in school?
- Do you have an idea of the kind of job or career you might want later?
- Do you prefer more practical or more academic learning?

I can then help you narrow it down further!
