

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Botswana. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and exciting question — congratulations on finishing primary school! Let's break it down to help you consider your next steps. In Denmark, after primary school (folkeskole), you typically have a few main options depending on your interests, strengths, and future goals:

General education paths

If you like academic subjects and might want to go to university later:

✓ Gymnasium (STX)

- A broad, academic upper secondary education (3 years)
- Focus on humanities, sciences, social sciences, languages
- Good if you enjoy subjects like Danish, English, history, biology, math

✓ Higher Technical Examination (HTX)

- More technical and science-oriented (3 years)
- Great if you enjoy technology, IT, science, engineering

✓ Higher Commercial Examination (HHX)

- Focuses on business, economics, and international trade (3 years)
- Useful if you like business, marketing, finance

Vocational education paths

If you're more interested in practical skills and want to work sooner:

✓ EUD / EUX (Erhvervsuddannelse)

- Vocational education and training (2-5 years depending on program)
- You learn a trade (e.g., electrician, carpenter, chef, hairdresser) and work as an apprentice
- **EUX** combines vocational training with academic subjects so you can still go to university

Things to consider

- 👉 **What subjects do you enjoy?** (e.g., science, arts, languages, technology, hands-on work)
 - 👉 **Do you want to study at university one day?** If yes, STX, HTX, HHX, or EUX are good options.
 - 👉 **Do you prefer learning by doing?** Then vocational training might suit you better.
 - 👉 **Do you want to study or work internationally?** HHX (business) or STX with languages can help.
-

Your background as an advantage

Since you have roots in Botswana and are fluent in Danish, you could consider:

- 🌱 Language-focused programs — add English, French, or German
 - 🌱 International business (HHX)
 - 🌱 Social sciences or cultural studies (STX)
 - 🌱 Global citizenship / development studies
-

My recommendation:

If you're still exploring, **STX** gives you a broad foundation, keeps your options open, and lets you choose a focus (science, languages, or social sciences).

If you love practical skills but still want a chance at university later, **EUX** could be ideal.

Next steps:

- 👉 Visit open house events at local schools.
- 👉 Talk to a guidance counselor (uddannelsesvejleder) at your school.
- 👉 Try job shadowing or internships during school breaks to get a taste of different careers.

If you tell me more about what subjects you like or what jobs you imagine for yourself, I can help you narrow it down even more! 🚀
