

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing a bit about yourself! You're at an exciting point in your life where you have a lot of options. In Denmark, after finishing primary school (Folkeskole), you generally have a few main educational paths to choose from, depending on your interests, strengths, and long-term goals.

Here's a breakdown of your options and what might be a good fit based on different interests:

🎓 1. Gymnasiale Uddannelser (General Upper Secondary Education)

If you're interested in academic studies and possibly going to university in the future, this is the route for you. There are a few different types:

- **STX (Studentereksamen):** Broad academic focus (sciences, languages, humanities). Great if you're unsure what to study later or want university options.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and international studies. Ideal if you're into business, marketing, or entrepreneurship.
- **HTX (Higher Technical Examination):** Focuses on technology, science, and engineering. Great if you enjoy hands-on science or want to study engineering later.
- **HF (Higher Preparatory Exam):** Shorter (2 years), more practical. Good for people who want more flexibility or maybe took a gap before deciding.

✅ Good fit if:

- You enjoy academic work and want to keep doors open for university
- You're fluent in Danish (as most subjects are in Danish)
- You want to study areas like medicine, law, teaching, engineering, or economics later

🔧 2. Erhvervsuddannelse (Vocational Education and Training - VET)

If you're more hands-on or want to start working sooner, a vocational path might suit you. You learn a trade and also do internships with real companies.

Common areas include:

- Electrician, carpenter, plumber
- Hairdresser, chef, baker
- IT-supporter, data technician

✓ Good fit if:

- You prefer practical work over academic theory
- You'd like to start earning earlier
- You're interested in a specific trade or skill

3. Combined Options or International Paths

Since you have Brazilian roots and likely some connection to the Portuguese language, there could be opportunities in international fields:

- **IB (International Baccalaureate):** An international high school program taught in English. A good choice if you're thinking about studying or working abroad.
- **Efterskole or Højskole (optional short-term boarding schools):** Not formal education, but can help you grow personally, improve English, explore interests (like sports, music, or global studies), and get a break before committing.

✓ Good fit if:

- You want to study in English
- You're interested in living abroad later
- You value cultural diversity and global experiences

☀ So, What Should *You* Consider?

Here are a few key questions to guide your choice:

- 1. Do you enjoy school and studying?**
 - If yes: Consider STX, HHX, HTX, or IB
 - If not really: Consider vocational education or HF
- 2. What are your interests?**
 - Business & languages? HHX
 - Science or tech? HTX or STX (science track)
 - Hands-on work? Vocational education
 - International outlook? IB or HHX with international focus
- 3. Do you want to go to university later?**
 - Then aim for STX, HTX, HHX, or IB

Personal Suggestion (Based on What You Shared)

Since you're fluent in Danish, born and raised in Denmark, but with a multicultural background, I'd recommend **STX** or **IB** if you're academically inclined — it keeps the most doors open. If you're more practically minded or want to work sooner, then a **vocational education** in a tech-related area (like IT or media) could also be a strong option, especially since Denmark has great apprenticeships.

If you're still unsure, you could also:

- Talk to a guidance counselor (studiebijleider) at your current school
 - Attend open house events at local gymnasiums and vocational schools
 - Try a short internship or job shadowing to explore fields of interest
-

If you want, I can help you build a comparison table or give you specific schools near where you live. Just let me know!
