

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brazil. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's awesome that you're already thinking carefully about your next steps! Since you're 16, fluent in Danish, and have finished primary school in Denmark (which likely means *folkeskole* up to 9th or 10th grade), you now have several good educational options, depending on your interests, strengths, and future goals.

Here's a quick overview of your main pathways:

1 Gymnasiale uddannelser (General upper secondary education)

These are good if you think you want to go to university later.

- **STX (Alment gymnasium)** — Broad academic program with focus on sciences, humanities, languages, and arts. Flexible if you're unsure what to specialize in.
- **HHX (Handelsgymnasium)** — Focus on business, economics, and international trade. A good choice if you're interested in business or want to work in companies.
- **HTX (Teknisk gymnasium)** — Focus on technology, natural sciences, and IT. Ideal if you enjoy science, technology, or engineering subjects.
- **HF (Højere forberedelseseksamen)** — A shorter, 2-year general program, often chosen by students who want to get to higher education quickly or are more practically oriented.

✓ Why choose this path?

You'll keep many options open for university and higher education. It's also great if you like academic subjects or aren't sure exactly what you want to do yet.

2 Erhvervsuddannelser (Vocational education and training / VET)

If you prefer to learn through practical work and maybe start a career faster, vocational education could be a great fit.

- Examples: electrician, carpenter, chef, hairdresser, IT supporter, etc.
- You combine school with an apprenticeship in a real company.

✓ Why choose this path?

You'll get hands-on experience, earn money during your apprenticeship, and be ready for a job faster. There are also options for further education later (e.g. erhvervsakademi, professionshøjskole).

💡 Some questions to reflect on before deciding:

- Do you enjoy academic learning (reading, writing, theory) or practical, hands-on work more?
- Are you aiming for university or keen to start a job sooner?
- Do you have particular interests already (science, business, technology, art, design, cooking, mechanics, etc.)?

🌟 Special note on your background:

Being bilingual/bicultural (Danish-Brazilian) is a huge strength! It could open doors in areas like international business, tourism, translation, or work with multicultural communities. If that interests you, programs like HHX (with focus on languages and international trade) or STX (with language lines) might fit well.

📌 My suggestion

Since you're fluent in Danish and finished folkeskole, I recommend:

👉 **If you want to keep doors open and explore more:** STX or HHX (if you're curious about business).

👉 **If you already have a strong interest in a trade/skill:** an *erhvervsuddannelse* in that field.

👉 **If you want shorter, more focused academic studies:** consider HF.

If you tell me a bit more about:

- What subjects you like most,
- What you enjoy doing outside school,
- Whether you're thinking of university, a specific job, or are unsure,

I can give you a more tailored recommendation!
