

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brunei Darussalam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about your background — that helps me give you more tailored advice! Since you're 16, finished primary school in Denmark, and fluent in Danish, let's break down your options thoughtfully.

📌 First, a small clarification

In Denmark, primary school (*folkeskole*) usually ends around age 15-16 (9th or 10th grade). It sounds like you might have finished 9th or 10th grade — correct me if I'm wrong!

🎓 Your main educational options after primary school in Denmark

Here are the typical pathways:

1 General Upper Secondary Education (Gymnasiale uddannelser)

This is for you if you enjoy academic subjects and might want to go to university later.

- **STX (Alment gymnasium)** – broadest education with focus on sciences, humanities, and arts.
- **HHX (Handelsgymnasium)** – focus on business, economics, and international trade.
- **HTX (Teknisk gymnasium)** – focus on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – 2-year option, often for those who want a more practical, shorter route to higher education.

💡 *Recommended if:*

- You like academic subjects.
- You want to keep your options open for university or higher education.

2 Vocational Education and Training (Erhvervsuddannelser, EUD)

You combine schooling with an apprenticeship (praktikplads) in a company.

Examples:

- Electrician
- Carpenter

- IT technician
- Social and health care assistant (SOSU)

💡 *Recommended if:*

- You want hands-on, practical training.
- You're eager to work in a specific trade or profession soon.

3 Combination programs (eux)

This gives you both a vocational qualification and a general upper secondary diploma — so you can go straight to work or to university.

💡 *Recommended if:*

- You want a trade but also want the option to go to higher education.

🕒 How to choose?

✅ Ask yourself:

- Do I enjoy studying general subjects (math, languages, science)?
- Do I prefer practical, hands-on learning?
- Do I have a career dream already (e.g. engineer, teacher, electrician, designer)?
- Would I like to work soon, or continue in school longer?

✅ Also consider:

- Visiting open house events (*åbent hus*) at local gymnasiums and vocational schools.
- Talking to a *UU-vejleder* (youth guidance counselor) — they can give personalized guidance.

☀️ My general advice

Since you're fluent in Danish and have completed primary school in Denmark, you have full access to all these options. If you're unsure and want to keep doors open, **STX** or **eux** can be great choices. They allow you time to explore interests while keeping university or work options flexible.

If you want, I can help:

- 👉 Suggest specific schools in your area
- 👉 Help you explore what subjects might suit you
- 👉 Draft a plan based on your interests

Feel free to tell me:

- What subjects or activities you enjoy
- Whether you're leaning toward academic study, practical work, or a mix
