

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Brunei Darussalam. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself—that helps me give a thoughtful answer! Since you're 16, have finished primary school in Denmark (I assume you mean **folkeskolen**, including 9th or 10th grade), and are now looking ahead, let's explore your options and how you might decide.

📌 Common educational paths in Denmark after primary school

1 Gymnasiale uddannelser (Upper secondary education preparing for higher education)

- **STX (Alment gymnasium)** — general upper secondary with focus on a broad range of subjects (humanities, natural science, social science).
- **HHX (Handelsgymnasium)** — focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** — focus on technology, natural science, IT.
- **HF (Højere forberedelseseksamen)** — 2-year program, good if you want a shorter, more practical preparation for higher education.

👉 All of these can lead to university or professional higher education.

2 Erhvervsuddannelser (EUD) (Vocational education and training)

- You learn a trade (e.g. carpenter, electrician, chef, hairdresser, IT support).
- Combines school and apprenticeship (praktik).
- Can lead directly to a job or to further education (e.g. erhvervsakademi, professionsbachelor).

3 Kombinerede forløb

- **EUX** — combines vocational training with general upper secondary subjects so you can both get a trade and qualify for higher education.

🤔 What to consider

✅ Your interests

- Do you like academic study, theory, and want to go to university? → STX, HHX, HTX, HF
- Do you enjoy practical work, hands-on learning? → EUD, EUX

✓ Your strengths

- Strong in maths/science → HTX
- Interested in business/economics → HHX
- Broad interests, humanities, languages, social science → STX

✓ Your goals

- Want to go to university? → Gymnasiale uddannelser
- Want to work sooner or have a skilled trade? → EUD/EUX

✓ Other factors

- Do you want flexibility to study abroad or in Denmark? All gymnasiale uddannelser open doors for that.
- Do you want to combine work and study? EUX might suit you.

🌟 My recommendation (based on what you shared)

Since you're fluent in Danish, born and raised in Denmark, and considering next steps:

- **If you're unsure and want to keep doors open:** I'd suggest **STX** or **HHX**, depending on whether you like general subjects or business/economics.
- **If you like practical + academic mix:** EUX could be a great choice.
- **If you're sure you want to work in a trade or craft:** Go for an **EUD** program.

💡 What you can do next

- Visit **uddannelsesguiden.dk** (UG.dk) — Denmark's official site for education guidance.
- Attend open house events (**åbent hus**) at gymnasiums or vocational schools.
- Talk to a **UU-vejleder** (youth guidance counselor) — they can give advice tailored to your interests.

If you tell me more about your interests (e.g. subjects you enjoy, career dreams), I can give a more specific recommendation! Do you have something in mind already? 🚀
