

Uddannelsesvejledning efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Bulgaria. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a really thoughtful and important question — and it's great that you're thinking carefully about your next steps! Let's break this down so I can give you some helpful guidance.

The Danish education system after primary school

After 9th or 10th grade (folkeskole), you typically have these main paths:

Gymnasiale uddannelser (Upper secondary education for academic preparation)

- STX (Studentereksamen – general upper secondary)
- HHX (Higher Commercial Examination Programme – business/economics focus)
- HTX (Higher Technical Examination Programme – technical/science focus)
- HF (Higher Preparatory Examination – shorter and more flexible, often for adults or if you want to move faster)

Erhvervsuddannelser (Vocational education and training)

- Combines school and apprenticeship at a company — you earn while you learn and become skilled in a trade (e.g. electrician, carpenter, hairdresser, chef).

Combination options

- EUX (mix of vocational and academic education — gives both a trade qualification and access to university)

How to choose?

Since you're fluent in Danish, your options are wide open! Consider:

What subjects do you enjoy?

- Love science/tech? → HTX might suit you.
- Passionate about business or languages? → HHX could be great.
- Want broad academic knowledge or don't know yet? → STX keeps doors open.
- Like working with your hands, being practical, and earning money early? → VET (erhvervsuddannelse) or EUX.

✓ How do you like to learn?

- Prefer theory, reading, writing, discussions → gymnasiale uddannelser.
- Prefer doing, creating, real-world work → vocational route.

✓ Your future dreams

- Want university later? → STX, HTX, HHX, HF or EUX.
- Want to work sooner and learn a craft/trade? → VET.

💡 Example scenarios

- *You love math + physics + tech → HTX.*
- *You want to be a chef → vocational education.*
- *You like languages, history, literature → STX.*
- *You're interested in starting a business → HHX.*
- *You're unsure and want a broad foundation → STX or HF.*

🌱 Other things to think about

- Talk to a vejleder (guidance counselor) — they can help you explore local schools and programs.
- Visit open house events (åbent hus) at gymnasiums or vocational schools.
- Think about where you want to live — some schools may be closer or better suited to you.

⚡ **Final tip:** There's no wrong path! In Denmark, the system is flexible — it's possible to change direction later if you change your mind.

If you'd like, tell me:

👉 What subjects do you enjoy the most?

👉 Do you see yourself working with your hands, with people, with computers, in business, etc.?

I can help recommend something more specific based on that! 😊
