

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burundi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's great that you're thinking carefully about your next step — and congratulations on finishing primary school! Since you're 16 and living in Denmark, you have a range of good educational paths ahead. Let's break it down so you can make a choice that fits your interests, strengths, and goals.

Your main options after primary/lower secondary school (folkeskole)

1 Gymnasiale uddannelser (Upper secondary school – academic focus)

If you want to keep many doors open for university or higher education:

- **STX (Studentereksamen):** General upper secondary, broad academic subjects (humanities, science, social science).
- **HHX (Higher Commercial Exam):** Focus on business, economics, international trade.
- **HTX (Higher Technical Exam):** Focus on technology, science, IT.
- **HF (Higher Preparatory Exam):** Shorter, more practical/theoretical mix, good if you want a faster path to higher education.

→ *Best for:* If you enjoy academic subjects and think you might want to go to university later.

2 Erhvervsuddannelser (Vocational education and training - VET)

If you prefer practical, hands-on learning and want to go directly into a skilled job or apprenticeship:

- Examples: Electrician, carpenter, healthcare assistant, IT support, chef, mechanic.

→ *Best for:* If you enjoy practical work, want to earn while you learn, and possibly work sooner (though you can still take further education after VET).

3 Combination paths (EUX)

This combines vocational training with academic studies so you can both get a skilled trade and qualify for higher education.

→ *Best for:* If you want both practical skills *and* the option to go to university.

How to choose?

Here are some questions to reflect on:

- Do you enjoy academic subjects, or do you prefer practical/hands-on work?
 - Do you see yourself going to university? Or working after a shorter education?
 - Are you interested in areas like business, technology, social sciences, or creative arts?
 - Would you like an international angle (e.g., HHX with focus on trade, or international gymnasium)?
-

☀ Other considerations

- ✓ Since you're fluent in Danish, you won't have language barriers — great!
 - ✓ You might also consider schools that value diversity or have international programs if that interests you.
 - ✓ You could also explore schools with strong support for students with multicultural backgrounds if you want to connect with both your Danish and Burundian heritage.
-

📝 What's next?

- Talk to your school guidance counselor (vejleder) — they can help match your interests with schools in your area.
 - Visit open house events at local gymnasiums and vocational schools to get a feel for them.
 - You could even do short internships or shadowing to explore fields you're curious about.
-

👉 If you want, tell me:

- What subjects do you like most in school?
- Do you have any career dreams already (even if they're vague)?
- Would you like me to list specific schools or programs near where you live?

That way, I can give even more tailored advice! 😊
