

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burundi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it sounds like you're at an exciting point in your life! Let's break it down so I can give you a thoughtful recommendation.

Key factors to consider

Since you just finished primary school (in Denmark that's typically *folkeskole* or *grundskole* at 9th or 10th grade level), your next step depends on:

- ✓ **Your interests** — What subjects or activities do you enjoy most?
- ✓ **Your strengths** — Are you stronger in practical tasks, academic work, or creative pursuits?
- ✓ **Your career dreams** — Do you already have a job or field you're curious about?
- ✓ **Your learning style** — Do you prefer hands-on learning or more theoretical study?

Your educational options in Denmark after primary school

Here are some of the main paths you can consider:

Gymnasiale uddannelser (Upper secondary school)

These are mostly academic programs that prepare you for university.

- **STX (Almen studentereksamen)** – Broad general education, good if you like many subjects (languages, science, humanities).
- **HHX (Højere handelseksamen)** – Focus on business, economics, marketing.
- **HTX (Højere teknisk eksamen)** – Focus on technology, science, engineering.
- **HF (Højere forberedelseseksamen)** – A 2-year program, often for people who want a shorter path to higher education or have been out of school a bit.

👉 *Recommended if:* You're interested in going to university later or want to keep your options open.

Erhvervsuddannelser (Vocational education and training - EUD/EUX)

Combines school with apprenticeship in a workplace. You can train for skilled jobs like carpenter, electrician, hairdresser, chef, social and health assistant, etc.

- **EUD** – Focus on getting a skilled trade.
- **EUX** – Combines vocational training with upper secondary exam, so you can also go to university.

👉 *Recommended if:* You prefer practical, hands-on learning and want to work soon but maybe keep the door open for higher education.

3 Other options

- **10th grade (efterskole, produktionsskole, or 10th grade at your local school)** – If you want a transition year to mature, explore interests, or improve grades.
- **International or special programs** – If you're interested in international education or special creative/technical schools.

✨ What might fit you?

Since you're fluent in Danish and born/raised in Denmark, you can freely choose among these. But your interests matter most:

- 💡 **Do you enjoy studying, reading, writing, analyzing?** → STX, HTX, HHX or HF could suit you.
- 💡 **Do you like building, creating, working with your hands?** → EUD or EUX could fit well.
- 💡 **Do you feel unsure or want to explore?** → 10th grade at an *efterskole* could be a great way to gain confidence and find your path.

📝 My suggestion

- 👉 If you want to keep your options wide open:
 - ✅ Consider **STX** (if you like a mix of subjects) or **EUX** (if you like practical + academic combo).
- 👉 If you're more practical and want to get started with a job:
 - ✅ Go for **EUD** in a field that interests you.
- 👉 If you feel you need more time to decide or grow:
 - ✅ A **10th grade at an efterskole** can be a great, fun year.

💬 Would you like to tell me:

- What are your favorite subjects or hobbies?
- Do you see yourself in university later, or starting work earlier?

I can help you narrow it down further based on that! 🚀
