

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Burundi. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself—that's really helpful context! Congratulations on finishing primary school! Let's break this down thoughtfully so you can consider options that fit your interests, strengths, and future goals.

Your situation

- Age: 16
- Location: Denmark
- Education: Completed primary school
- Language: Fluent in Danish (and possibly other languages from home)
- Cultural background: Danish-Burundian
- Next step: Choosing post-primary education

Educational paths available in Denmark after primary school

In Denmark, after primary/lower secondary school (folkeskole), you typically choose between:

1 General upper secondary education (gymnasiale uddannelser)

Focuses on academic subjects and prepares you for higher education (university or similar).

- **STX (Studentereksamen):** Broad and academic; good if you want to keep options open.
- **HHX (Higher commercial exam):** Focus on business, economics, and marketing.
- **HTX (Higher technical exam):** Focus on technology, science, and IT.
- **HF (Higher preparatory exam):** Shorter and often chosen by those wanting flexibility or adult education path.

 Best if: You enjoy academic subjects, want to go to university, or are unsure what to study later.

2 Vocational education and training (erhvervsuddannelse/EUD)

Combination of school and apprenticeship (praktik). You train for a specific job (e.g., carpenter, chef, electrician, health care worker).

✅ Best if: You prefer hands-on learning, want to enter the workforce sooner, or have a specific trade/job in mind.

3 Other possibilities

- **Combination courses (eux):** Mix of vocational training + general upper secondary exam so you can go directly to work *or* continue to higher education.
- **10th grade:** Extra year if you feel you need more time to decide or want to improve grades.

🤔 How to choose?

Here are some questions you could ask yourself:

- Do I enjoy academic subjects (math, science, literature) or practical work (building, designing, cooking)?
- Do I dream of a certain profession (doctor, teacher, IT specialist, electrician)?
- Would I rather go to university later or start working/training sooner?
- Do I like learning through books and lectures or through doing and practice?

🌟 My recommendation (based on what you've told me so far)

Since you're fluent in Danish and have completed primary school, **you have all options open.**

If you:

- want to **keep your doors open** and aren't sure yet what you want → **STX** or **HF**
- have interest in business → **HHX**
- are drawn to technology or science → **HTX**
- are eager for hands-on learning → **EUD** or **EUX**

💡 Tips for your decision

- ✅ Attend open house events (åbent hus) at schools in your area
- ✅ Talk to your school's guidance counselor (UU-vejleder)
- ✅ Visit **ug.dk** (official Danish education site) for more information
- ✅ Ask people working in fields you're curious about

If you want, tell me a bit more about:

- 👉 What subjects or activities you enjoy most?
- 👉 What kind of jobs or fields interest you?

Then I can give you more tailored advice! 😊
