

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cambodia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a thoughtful answer. Let's break this down so you can make a good decision about your next step after primary school.

Possible educational paths after primary school in Denmark

Since you've completed **Folkeskole (primary + lower secondary school)** at around age 16, these are your main options:

General upper secondary education (Gymnasiale uddannelser)

If you want a broad academic foundation that prepares you for university, these are good choices:

- **STX (Alment Gymnasium)** – Focus on a wide range of subjects (science, humanities, social science). Suitable if you're interested in keeping many doors open for university.
- **HHX (Handelsskole)** – Focus on business, economics, and international subjects.
- **HTX (Teknisk Gymnasium)** – Focus on science, technology, and innovation.
- **HF (Højere Forberedelseseksamen)** – A 2-year program, often for those who prefer a shorter academic track, sometimes for more mature students.

Recommended if:

You enjoy studying a variety of subjects, want to go to university later, or aren't sure yet what to specialize in.

Vocational education and training (Erhvervsuddannelse - EUD)

If you prefer a more practical, hands-on education leading to a trade or craft, you can choose:

- Apprenticeships (e.g., carpenter, electrician, chef, hairdresser)
- Combination of school and work-based training

Recommended if:

You like learning by doing, want to enter the workforce faster, or have a specific craft you're passionate about.

Combined programs

- **EUX** – A mix of vocational training + gymnasial level academic courses, so you can both learn a trade and qualify for university.

👉 Recommended if:

You want a practical skill but also want to keep the option open for higher education.

💡 Things to consider

- ✓ **What subjects do you enjoy most?** Science? Languages? Technology? Art?
 - ✓ **Do you prefer academic studies or practical work?**
 - ✓ **Do you see yourself going to university?** Or starting a career earlier?
 - ✓ **Would you like to study something connected to your cultural heritage (e.g. international business, languages, history)?**
-

🌟 My suggestion (based on what you've told me so far)

Since you're fluent in Danish, have completed Danish schooling, and are at a natural transition point:

- ➔ **If you enjoy school and want to keep doors open:** Consider **STX** or **HTX** depending on your interest in humanities/social science or technology/science.
 - ➔ **If you're drawn to business and international themes:** HHX could be a great fit.
 - ➔ **If you're eager to work hands-on or in a skilled trade:** EUD or EUX can be excellent, respected paths.
-

📝 Next steps

- 👉 Visit open house events at local gymnasiums or vocational schools.
 - 👉 Talk to your school counselor (UU-vejleder) — they can help you choose based on your strengths.
 - 👉 Consider doing a short internship (praktik) or job shadowing during summer to explore trades or fields you're curious about.
-

💬 If you tell me more about your interests (e.g. favorite subjects, hobbies, career dreams), I can help you narrow down the best choice! Would you like that?
