

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cameroon. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.
What educational path would you recommend for me?

Thank you for sharing your background! It's great that you're thinking carefully about your next steps. Since you've just finished primary school in Denmark (typically after 9th or 10th grade in **folkeskole**), you're at an important crossroads. I'll break down your options and give recommendations based on common paths, with ideas tailored to your situation:

Your main educational options after primary school in Denmark

1 Gymnasiale uddannelser (general upper secondary education)

- If you want to keep your options open for university studies.
- Examples:
 - **STX (Almen studentereksamen)** — broad academic education
 - **HHX (Højere handelseksamen)** — focus on business and economics
 - **HTX (Højere teknisk eksamen)** — focus on technology, natural sciences
 - **HF (Højere forberedelseseksamen)** — shorter (2 years), more practice-oriented

Good for you if:

You enjoy academic subjects, want to go to university, or aren't sure what to specialize in yet.

2 Erhvervsuddannelse (vocational education and training - VET)

- Combines school + apprenticeship (praktik) in a company
- Leads directly to a trade/profession (e.g., carpenter, electrician, hairdresser, IT-supporter, healthcare assistant)

Good for you if:

You like practical work and want to start a career faster (often with good job security).

3 Kombineret uddannelse (EUX)

- Combines vocational education with a gymnasium-level qualification
- You get both a vocational degree **and** the option for higher education

👉 Good for you if:

You want practical skills + the chance to study at university later.

✨ My recommendations for you

Since you:

- ✅ are fluent in Danish
- ✅ have roots in both Danish and Cameroonian cultures (can be an advantage in many fields!)
- ✅ just finished primary school and are exploring options

👉 I suggest:

- If you like academic subjects and want to keep doors open → **STX** (general gymnasium) or **HHX** (if you like business/economics)
- If you enjoy technology, science, or practical applications → **HTX**
- If you want to work hands-on but keep university as an option → **EUX**

You could also consider trying **brobygning** (bridging programs) or **praktik** opportunities before deciding — these let you experience different schools or trades for a short period.

💡 Other things to think about

- What subjects do you enjoy most (e.g., languages, math, science, business, arts)?
 - Do you want to study at university in the future, or start working sooner?
 - Would you like international opportunities (your bilingual/cultural background is a strength!)?
-

If you want, I can help:

- ✅ Make a pros/cons list for different paths
- ✅ Find specific schools near you
- ✅ Suggest careers that match your interests

Would you like help with that? And could you tell me: *What are your favorite subjects or activities?*
