

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! It's great that you're thinking carefully about your next steps after primary school. In Denmark, after completing **folkeskole** (primary and lower secondary school), you have a few main educational paths to consider. Since you're 16, you're at the typical age to begin **youth education (ungdomsuddannelse)**. Here's an overview of your options, along with some advice to help you decide:

1. Gymnasiale Uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for higher education (university, professionshøjskole, etc.).

Main types:

- **STX** – Studentereksamen (general upper secondary)
- **HHX** – Higher commercial exam (focus on business/economics)
- **HTX** – Higher technical exam (focus on science/technology)
- **HF** – Higher preparatory exam (shorter, more practical)

Who it's for: If you're interested in continuing to university or want to keep many doors open.

Pros:

- Broad education
- Many paths afterward
- Good social environment

Cons:

- More academic/theoretical

2. Erhvervsuddannelser (Vocational Education and Training – VET)

This is for you if you'd like to learn a trade and start working sooner. It combines school with paid internships (praktikplads).

Examples of fields:

- Electrician, carpenter, chef, healthcare assistant, mechanic, etc.

Pros:

- You learn a real skill
- You can earn money during training
- Good job opportunities after

Cons:

- Less focused on university (though there are still some options for further study later)

3. Kombinerede Forløb / EGU / EUX

If you want **both a trade and the option to study later**, consider:

- **EUX**: Combines vocational training with academic subjects so you can qualify for higher education
- **EGU**: More flexible, for students who may need extra support and want a more practical path

✨ How to Decide?

Here are some guiding questions:

- Do you enjoy academic subjects like languages, science, or history? → Consider **STX, HTX, HHX, or HF**
- Are you more practical and hands-on? Like building, creating, or helping people directly? → Try **VET or EUX**
- Do you want to work sooner, or go to university later? Or maybe both? → Look at **EUX**

Try “UddannelsesGuiden” (UG.dk)

The official Danish education guide: <https://www.ug.dk>

You can also speak to an **UU-vejleder (Youth Guidance Counselor)**. They help students like you choose the right path based on interests and strengths.

✅ Final Tips

- **Visit open houses** (åbent hus) at local schools and training centers
- **Talk to students** who are already in those programs
- Don't feel pressured to know *everything* now — your first choice doesn't lock your future forever

If you tell me what subjects you enjoy most or your dream job, I can give a more specific suggestion too.
