

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Central African Republic. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question — and it's wonderful that you're thinking ahead about your future! Since you've just finished primary school in Denmark (which typically means you're done with *folkeskole* or *grundskole* around 9th or 10th grade), you have several good educational options depending on your interests, strengths, and career dreams.

Let's break it down:

🎓 Your Main Options After Folkeskole

In Denmark, young people usually choose between these main educational paths:

1 Gymnasiale uddannelser (General upper secondary education)

These programs prepare you for university or higher education:

- **STX (Alment gymnasium)** – broad, academic, with many subjects.
- **HHX (Handelsskole)** – focuses on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – focuses on technology, science, and innovation.
- **HF (Højere forberedelseseksamen)** – shorter, often for those who prefer practical + academic mix (usually after 10th grade).

✅ Good for you if:

- You enjoy academic subjects.
- You might want to go to university.
- You're not sure what job you want yet and want to keep options open.

2 Erhvervsuddannelser (Vocational education and training / VET)

These combine school and apprenticeship, leading to a skilled job (e.g. carpenter, chef, electrician, healthcare assistant).

✅ Good for you if:

- You prefer hands-on, practical learning.
- You want to start working earlier.
- You're interested in a specific trade or craft.

3 Kombinationsforløb (EUX)

This combines vocational training (VET) with upper secondary education so you can both learn a trade *and* be qualified for university.

✓ Good for you if:

- You want to learn a trade but also want to keep the door open for higher education.

🔑 How to Choose?

Ask yourself:

- What subjects do I enjoy most? (e.g. science, languages, business, technology, art)
- Do I prefer practical or theoretical work?
- Do I want to start working sooner, or am I aiming for university?
- How do I like to learn — with books and theory, or by doing?

☀️ Recommendation

Since you're fluent in Danish and have already navigated school well:

- If you like general academic learning and want options open → **STX or HHX**
- If you're into science, IT, or technology → **HTX**
- If you're more practical and want a job focus → **EUD or EUX**
- If you want something shorter or need a more flexible path → **HF**

📌 Next Step

- 👉 Consider visiting open house events at local gymnasiums and vocational schools.
- 👉 Talk to a *UU-vejleder* (youth guidance counselor) — they can give personal advice.
- 👉 You could also try a *brobygning* (bridging course) or internships to get a taste of different paths.

If you tell me more about your interests (e.g. favorite subjects, hobbies, dream jobs), I can give a more personalized suggestion! 🌱

Would you like to share that?
