

Uddannelsesvalg efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's fantastic that you're thinking carefully about your next steps! Let's break it down so I can give you a useful recommendation based on your situation:

Your context

- ✓ You're 16 — so you've completed *folkeskolen* (primary/lower secondary school).
- ✓ You're fluent in Danish — so you can easily navigate the Danish education system.
- ✓ You have a multicultural background — this can be an asset in many fields.

Common paths after primary school in Denmark

In Denmark, after *folkeskolen*, most students choose one of these main paths:

1 Gymnasiale uddannelser (upper secondary education) – academic focus

- **STX** (Almen studentereksamen): Broad, general academic education (good if you're unsure yet what you want to study).
- **HHX** (Handelsgymnasium): Focus on business, economics, and marketing.
- **HTX** (Teknisk gymnasium): Focus on technology, natural sciences, and IT.
- **HF** (Højere forberedelseseksamen): Shorter (2 years), good if you want more practical orientation or didn't enjoy school so much.

2 Erhvervsuddannelse (vocational education / apprenticeships)

- Combines school with paid practical work (apprenticeship).
- Leads directly to a job (e.g. electrician, carpenter, chef, health assistant).
- You can later build on it (e.g. become a foreman, take a vocational bachelor).

3 Kombinerede forløb (EUX)

- Combines vocational training + gymnasium-level education.
- You get both a trade and the right to apply for university.

How to choose?

It depends on:

💡 Interests

- Do you enjoy academic subjects (literature, science, languages, history)? → Consider STX / HTX / HHX.
- Do you like practical work, creating things, working hands-on? → Consider an *erhvervsuddannelse* or EUX.
- Are you drawn to business or tech? → HHX or HTX could be great.

💡 Future plans

- Do you see yourself at university later? → Gymnasium (STX/HHX/HTX) is the most common path.
- Do you want to work sooner, or you learn better by doing? → Erhvervsuddannelse or EUX.

💡 Learning style

- Do you prefer books, theory, discussions → gymnasial.
- Do you prefer action, practice, and applying knowledge → vocational or EUX.

📝 My suggestion based on what you've told me

Since you just finished primary school and seem thoughtful about your future:

👉 **STX** could be a good “safe” choice — it keeps many doors open (university, higher education, etc.) and lets you explore a range of subjects.

👉 If you're interested in business or economics, **HHX** might suit you.

👉 If you're passionate about technology, science, or engineering, **HTX** could be exciting.

👉 If you feel you want something more practical, or aren't keen on sitting at a desk all day, explore **EUX** or vocational programs.

🌟 Other tips

- Visit open house events (*orienteringsaftener*) at schools — get a feel for the environment.
- Talk to a *UU-vejleder* (youth guidance counselor) — they can help match your interests to options.
- Remember: no decision is forever — Denmark's system makes it possible to change path later.

If you tell me a bit more about your interests (e.g. do you like math, science, languages, art, working with people?), I can give you a more tailored recommendation! Would you like that? 😊
