

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Chile. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's thoughtful of you to consider your options carefully at this stage! Since you've just finished primary school (in Denmark, that's **folkeskole** — usually through 9th or 10th grade), you're now at a point where you can choose between different upper secondary (ungdomsuddannelser) paths depending on your interests, strengths, and future plans. Let's break down your main options:

General upper secondary education (for university preparation)

If you're thinking about going to university later, these are strong choices:

✓ STX (Studentereksamen)

- The most common upper secondary education.
- Focuses on a broad mix of subjects: humanities, natural sciences, social sciences.
- Good if you want to keep many doors open.

✓ HHX (Higher Commercial Examination)

- Focuses on business, economics, marketing, and international studies.
- Great if you're interested in business, trade, or management.

✓ HTX (Higher Technical Examination)

- Focus on technical subjects, natural sciences, technology.
- Good if you like science, IT, technology, engineering.

✓ HF (Higher Preparatory Examination)

- A 2-year option (instead of 3) aimed at those who want a shorter path to higher education or who prefer a less traditional approach.

Vocational education and training (EUD/erhvervsuddannelser)

If you want to combine learning with hands-on work and maybe start working faster or continue to further education:

✓ EUD (Vocational education)

- You choose a trade or craft (e.g., electrician, carpenter, hairdresser, chef, healthcare worker).

- Includes both school and apprenticeship in a company.
- You can also build on it later to go to a technical college or business academy.

✅ **EUX (Vocational + academic combination)**

- A mix of vocational training with general upper secondary subjects.
- Gives you both a trade qualification *and* access to higher education.

🌍 **Other things to consider**

- **Language and cultural strengths:** You have Chilean roots and speak Danish fluently. Maybe you could use that in international business, diplomacy, tourism, or translation?
- **Interests:** What subjects do you enjoy most? (math, science, languages, arts?)
- **Future goals:** Do you want to go to university? Or start working as soon as possible?

★ **My recommendation**

Since you're at a decision point and still exploring:

👉 **If you want to keep your options open for university and you like school subjects:** STX or HHX might be great.

👉 **If you prefer practical work and want to earn while you learn:** consider EUD or EUX.

👉 **If you're not sure and want help deciding:** talk to an **UU-vejleder** (youth education counselor) — they can guide you based on your interests and grades.

If you tell me more about:

- what subjects you like or dislike,
- whether you want to study at university or not,
- or if you want to work in Denmark or maybe abroad later,

I can give you a more tailored suggestion! 😊
