

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from China. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself! It's great that you're reflecting carefully on your next step — this shows maturity and foresight. Let's break this down thoughtfully so you can consider your options in Denmark's education system.

🎓 Educational paths after primary/lower secondary school (folkeskole)

Since you're 16 and have finished primary school, you typically have these main options in Denmark:

1 General upper secondary education (gymnasiale uddannelser)

→ **STX (studentereksamen)** – Broad academic program (humanities, science, social science)

→ **HHX** – Focus on business and economics

→ **HTX** – Focus on technology and science

→ **HF** – 2-year general upper secondary, often for more mature students

✓ Good if you want to keep university doors open and are interested in academic study.

2 Vocational education and training (EUD/EUX)

→ Apprenticeship + practical skills + school

→ **EUX** gives you both vocational training + a studentereksamen equivalent, so you can go to university later

✓ Great if you're interested in learning a trade or profession (e.g., IT, health care, engineering technician, chef) but still want academic options.

3 International options

→ If you're interested, you could explore International Baccalaureate (IB) or international schools, especially since you're fluent in Danish and might also be strong in English or Chinese.

✓ Good if you think you might study or work abroad later.

☀️ What should guide your choice?

💡 Your interests and strengths

- Do you enjoy academic subjects like science, languages, social science? → STX/HTX/HHX
- Are you more hands-on, practical, and like to see immediate results of your work? → EUD/EUX

💡 Your long-term goals

- Want to go to university? → STX, HTX, HHX, HF, EUX
- Prefer to get into the job market earlier with practical skills? → EUD

💡 Your personal preferences

- Do you like working with people, technology, business, or something else?

🇩🇰 My recommendation based on what you've shared

Since you're fluent in Danish, born in Denmark, and probably familiar with Danish culture + educational style, I suggest:

- ➔ **Consider STX if you want the broadest academic base** — it keeps doors open to almost all university studies.
- ➔ **Consider HTX if you have an interest in science/technology** — good future opportunities, especially in engineering, IT, biotech.
- ➔ **Consider HHX if business, economics, or entrepreneurship interests you.**
- ➔ **Consider EUX if you want both a trade and the possibility of university.**

✨ Next steps

- ✓ Visit schools (they often have info evenings or open house days)
- ✓ Talk to guidance counselors (studievejledere) at your school or local UU-vejledning
- ✓ Consider what subjects you liked most in school — and what type of learning suits you

If you want, I can help you:

- 👉 Make a pros/cons list for each option
- 👉 Explore specific schools/programs in your region
- 👉 Plan for how your bilingual background could be an advantage

Would you like that? And do you already have an idea of what subjects or areas you enjoy most?
