

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Colombia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's wonderful that you're thinking carefully about your next steps! Since you're 16, have finished primary/lower secondary school (*folkeskolen*), and are fluent in Danish, you have several good options depending on your interests, strengths, and future goals. Let me break it down for you:

Main educational paths in Denmark after primary school

Gymnasiale uddannelser (Upper secondary education – academic focus)

These are for you if you're aiming for university later. There are different types:

- **STX (Alment gymnasium)** – broad and academic, includes humanities, science, social science, languages.
- **HHX (Higher commercial exam)** – focuses on business, economics, marketing.
- **HTX (Higher technical exam)** – focuses on technology, science, IT.
- **HF (Higher preparatory exam)** – shorter (2 years), more practice-oriented, can also lead to university or professional training.

 Recommended if: You like academic subjects, want to keep your options open for higher education, or want to study at university or business/engineering schools later.

Erhvervsuddannelser (Vocational education and training, EUD)

This combines school and apprenticeship in a company. You can train for a trade (e.g., carpenter, electrician, hairdresser, chef, etc.)

 Recommended if: You want to learn a trade, work with your hands, get into the job market faster, or possibly continue later to *EUX* (a vocational + academic combo that allows you to go to university too).

EUX (Vocational + academic combo)

A mix of vocational training and upper secondary academic education. It's more demanding but gives you both a trade qualification and eligibility for higher education.

 Recommended if: You like practical work but also want to keep the door open for university or professional higher education.

Considering your background

Since you are fluent in Danish and grew up in Denmark, you have the same opportunities as any Danish student. But with your Colombian heritage, you might also think about:

- ✓ Language strengths (Spanish + Danish = advantage in jobs involving international work or multicultural environments).
 - ✓ Interest in international business, diplomacy, tourism, or language teaching?
-

How to choose?

Ask yourself:

- Do I prefer academic studies or practical, hands-on learning?
 - Do I want to go to university later?
 - What subjects excite me most — science, humanities, business, technology, arts, or crafts?
 - Do I want to start working sooner or continue studying?
-

My suggestion (if you want to keep options open)

If you enjoy studying and want to explore before deciding, **STX** or **EUX** could be great.

If you already know you like business, **HHX** is strong.

If you're technical or like science/IT, **HTX** is smart.

If you want to get a profession soon but might want further study, **EUX** is very flexible.

 If you tell me more about:

- What subjects you like most
 - Whether you want to study at university
 - Whether you prefer school or more practical work
- I can give you a more tailored recommendation!

Would you like that? 😊
