

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking about your future already. Since you're 16, have finished primary school (**folkeskole**), and speak fluent Danish, you have several solid options depending on your interests, strengths, and goals.

Here's a breakdown of the **main educational paths available after folkeskole in Denmark**:

1. Gymnasiale uddannelser (Upper Secondary Education)

These are the academic paths that prepare you for university.

Options:

- **STX (Studentereksamen)** – General upper secondary education with a focus on science, languages, and humanities.
- **HHX (Højere Handelseksamen)** – Focus on business, economics, and marketing.
- **HTX (Højere Teknisk Eksamen)** – Focus on technology, science, and innovation.
- **HF (Højere Forberedelseksamen)** – Shorter, 2-year version, good if you want to go to university but not do 3 years of gymnasium.

Best for you if:

You enjoy academic subjects and think you might want to go to university someday.

2. Erhvervsuddannelse (Vocational Education and Training – EUD)

This combines school and work experience, training you for a specific job.

Fields include:

Hairdressing, mechanics, carpentry, child care, cooking, healthcare, IT, etc.

You'll often do apprenticeships (praktik) and get paid during them.

Best for you if:

You like hands-on work, want to enter the job market sooner, and maybe earn while you learn.

3. Kombineret ungdomsuddannelse (KUU)

If you're unsure about what to do and maybe need more support or want a more practical approach, this "combined youth education" helps you try different things and build basic skills.

Best for you if:

You want more time to explore your interests or need help getting ready for more advanced education.

Some things to think about:

- **Do you enjoy school and studying theory?** → Consider STX, HHX, HTX, or HF.
 - **Are you more into practical learning or working with your hands?** → Look into EUD or EUX (a mix of vocational and academic).
 - **Want to keep options open?** → EUX lets you get a vocational education and qualify for university at the same time.
-

My Recommendation (based on what you've said):

Since you're fluent in Danish, have completed primary school, and have a multicultural background, you're in a strong position.

If you're not sure what you want to be yet, I'd suggest **STX or EUX** to keep your future options open while you figure things out. If you already know what interests you (e.g., business, technology, healthcare), then HHX, HTX, or a vocational track could be a better match.

Need help deciding?

I can guide you more precisely if you tell me:

- What subjects do you enjoy most?
- What are your hobbies?
- Do you want to work soon or study longer?
- Are you more academic or practical?

Let me know, and I'll help you figure it out!
