

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — it's great that you're already thinking carefully about your next step! Since you've finished primary school in Denmark at age 16, you're likely considering the options that follow *folkeskole* or *10. klasse*. Let's break it down so you can see what paths might fit you.

Main educational options after primary school in Denmark

Here are the typical routes for students in your situation:

1 Gymnasiale uddannelser (Upper secondary education - academic focus)

If you enjoy academic subjects and might want to go to university later, these are good options:

- **STX (Alment gymnasium)** – Broad academic education in sciences, humanities, social sciences.
- **HHX (Handelssgymnasium)** – Focus on business, economics, and international studies.
- **HTX (Teknisk gymnasium)** – Focus on technology, natural sciences, innovation.
- **HF (Højere forberedelseseksamen)** – A 2-year general education (often for older students or those wanting a more direct path to higher ed).

2 Erhvervsuddannelser (Vocational education and training - EUD)

If you prefer hands-on learning and want to work sooner, you can train for trades (like electrician, carpenter, health worker, IT technician). You can also combine this with **EUX**, where you get both a vocational qualification and a gymnasium-level exam — so you can work *and* go to university later.

What might suit you?

Since I don't know your interests yet, here's how you can reflect:

- ✓ Do you enjoy school subjects like languages, math, history, or science? → STX, HTX, HHX, HF
- ✓ Are you more into practical work, creating things, fixing, or helping people directly? → EUD, EUX
- ✓ Do you want to keep options open for university? → STX, HHX, HTX, EUX
- ✓ Are you keen on business or tech? → HHX or HTX
- ✓ Are you unsure? → Consider 10. klasse, where you can try out different directions, improve grades, or explore.

Special tips for you

- Since you're fluent in Danish and have a multicultural background, you could thrive in international business (HHX) or areas where cultural understanding is a strength.
 - Denmark also supports young people in exploring through **brobygning (bridge-building courses)** — short experiences at different schools. You might want to try this before deciding.
 - There are also opportunities for apprenticeships (praktikplads) in EUD — think about whether you'd like to earn while you learn.
-

Next steps

 Ask yourself:

- What subjects or activities make me excited?
- Do I like theory or practice more?
- Do I want to study more years before working?

 Visit open house events at local gymnasiums or vocational schools — they often let you try classes for a day.

 Talk to an *UU-vejleder* (educational guidance counselor) — they're there to help you find your best path.

 If you tell me more about what you enjoy (subjects, hobbies, dreams for the future), I can give an even more tailored suggestion! Would you like that? 😊
