

Uddannelsesmuligheder efter folkeskolen

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Comoros. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

Thank you for sharing that! It's great that you're thinking carefully about your next steps. Since you've just finished primary school in Denmark (which I assume means **folkeskolen** and possibly the 9th or 10th grade), you have several good options depending on your interests, strengths, and future ambitions.

Here's a breakdown of paths you could consider:

Gymnasiale uddannelser (General upper secondary education)

If you want to keep many doors open for higher education (university, university college), this might be a good fit. These programs last **3 years** (STX, HHX, HTX) or **2 years** (HF).

- **STX (studentereksamen)** – Focus on a broad academic education: humanities, natural sciences, social sciences. Good if you're not sure what to specialize in yet.
- **HHX (higher commercial exam)** – Focus on business, economics, and international trade. Useful if you're interested in commerce or entrepreneurship.
- **HTX (higher technical exam)** – Focus on technology, science, and innovation. Great if you like tech, engineering, or natural sciences.
- **HF (higher preparatory exam)** – A more practical academic route, typically 2 years, often for slightly older students or those who want a shorter program before higher education.

Erhvervsuddannelser (Vocational education and training, EUD)

If you want to **work with your hands, gain practical skills, and enter the job market sooner**, vocational training could be ideal.

- Examples: electrician, carpenter, hairdresser, chef, healthcare assistant, IT technician.
- Many programs also offer the **EUX** track, combining vocational training with subjects that give you access to university-level studies.

International or alternative programs

If you're interested in expanding your horizons:

- **IB (International Baccalaureate)** – Taught in English, internationally recognized, academic.

- **Efterskole or højskole stay** – Can give you a chance to mature, gain new experiences, or focus on specific interests (music, sports, design).
-

How to decide?

- ✓ **What subjects excite you most?** – Are you drawn to science, business, art, technology, languages?
 - ✓ **Do you want to study more theory, or work more practically?** – This can help you choose between gymnasium and vocational training.
 - ✓ **Do you want to go to university later, or start working earlier?**
 - ✓ **Talk to a guidance counselor (UU-vejleder)** – They can provide advice tailored to your situation.
-

My suggestion (if you're unsure yet)

Since you're fluent in Danish, have finished primary school, and are still exploring your interests:

- 👉 Consider **STX** or **HTX** if you like school and want to keep your options open.
 - 👉 Consider **EUX** if you want practical skills + the option for higher education later.
 - 👉 Consider **HHX** if you're already curious about business or entrepreneurship.
-

If you tell me a bit more about:

- Your favorite subjects
- Hobbies or things you enjoy outside of school
- Whether you like practical work or theoretical study

...I can give you a more specific recommendation! Would you like that? 😊
