

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Congo. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great question, and it's excellent that you're thinking carefully about your next step! Since you've just finished primary school (or *folkeskole* in Denmark), you're at an important crossroads. I'll outline some options and give you things to consider, so you can choose what fits you best:

Main educational options after folkeskole

In Denmark, after 9th or 10th grade, most students choose between:

Gymnasiale uddannelser (Upper Secondary Education) – if you want to continue to university later

- **STX (Almen gymnasium)** – broad academic focus (languages, science, social studies).
- **HHX (Handelsgymnasium)** – focus on business, economics, and languages.
- **HTX (Teknisk gymnasium)** – focus on technology, science, and IT.
- **HF (Højere forberedelseseksamen)** – shorter, more practical academic program (usually 2 years), often for slightly older students or those who want a fresh start.

Erhvervsuddannelser (Vocational Education and Training - EUD)

- Combines school with apprenticeships in a company (e.g. electrician, chef, mechanic, healthcare assistant).
- You earn while you learn and get job experience.

Kombineret uddannelse (EUX)

- Combines vocational training with gymnasial-level academic subjects.
- Good if you want both practical skills and the option to go to university later.

What to think about

✓ **Interests:** Do you like academic subjects? Science, languages, business? Or do you prefer practical, hands-on work?

✓ **Future goals:** Do you want to go to university, or start working earlier with skills?

✓ **Learning style:** Do you like classroom learning, or learning by doing?

✅ **Job dreams:** Do you already have a career in mind (e.g. doctor, engineer, designer, chef, entrepreneur)?

☀️ Example paths

- **If you love school subjects, want a university path, and aren't sure what field yet:** STX
 - **If you're interested in business or economics:** HHX
 - **If you're into technology, science, or design:** HTX
 - **If you want to work with your hands and start earning earlier:** EUD (or EUX if you want to keep university options open)
-

💡 Tip

Since you're fluent in Danish and you also have roots in Congo, you might have strengths in languages or intercultural communication — that can be an asset in many fields!

👉 Next step:

I recommend you talk to your school's *UU-vejleder* (youth guidance counselor). They can help you explore options, arrange visits to schools, or even internships (*brobygning*).

If you want, you can tell me a bit more:

- What subjects do you like most?
- Do you like working with people, technology, ideas, or your hands?
- Any dream jobs or things you're curious about?

Then I can help you think of more specific recommendations! 🚀
