

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Costa Rica. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background — that helps a lot. Since you've just finished primary school in Denmark and you're thinking about your next step, here's a breakdown of your main educational options and how you might think about choosing between them:

Main Educational Paths After Primary School in Denmark

After 9th or 10th grade, Danish students typically choose between **academic upper secondary education** or **vocational education and training (VET)**. Here's a quick overview:

1. Gymnasium (STX, HHX, HTX, HF) – *Upper Secondary School*

These are 2–3 year programs that prepare you for **university or higher education**.

- **STX (Studentereksamen)** – General academic with focus on humanities, science, or languages.
- **HHX (Higher Commercial Examination)** – Focus on **business and economics**.
- **HTX (Higher Technical Examination)** – Focus on **science and technology**.
- **HF (Higher Preparatory Examination)** – Shorter (2 years), good if you want to **get into university but not spend 3 years in gymnasium**.

✓ Best if:

- You like academic subjects
- You think you might want to go to university
- You're not sure yet what you want to do and want to keep doors open

2. EUD (Erhvervsuddannelse) – *Vocational Education and Training*

This combines **school and apprenticeship**. You learn a trade (like electrician, hairdresser, mechanic, chef, etc.) and go straight into a job after.

✓ Best if:

- You want to work with your hands
- You prefer practical learning over academic
- You want to **start earning money earlier**

3. EUX – *The Best of Both Worlds*

EUX is a **combined vocational and academic program**. You get both a trade **and** a diploma that can lead to university.

✅ Best if:

- You like both practical and academic subjects
- You're not sure whether you want to work or go to university later

Things to Consider

1. Your Interests and Strengths

Do you enjoy reading, writing, and school subjects? Or do you prefer doing practical tasks, making things, or working with people?

2. Career Ideas

Even if you're not sure yet, do you imagine yourself in a profession like doctor, teacher, engineer, businessperson, artist, or something more hands-on?

3. Long-Term Flexibility

Gymnasium gives you more options later. Vocational education is quicker into the workforce but more specialized.

Recommendation Based on What You Said

You're bilingual, bicultural, and fluent in Danish — that's a **huge advantage**, especially in international fields, education, or business.

If you're not yet sure what you want to do but are motivated and do well in school, I'd recommend:

👉 **STX or HHX:**

- **STX** if you enjoy languages, science, or humanities.
- **HHX** if you're interested in business, economics, or international affairs (which might fit your background well).

If you're more into doing things with your hands or want a job sooner, then **EUX** could be a smart choice — it keeps both doors open.

Bonus Thought

With your Costa Rican background and Danish upbringing, you could eventually aim for a career involving **languages, diplomacy, education, international business, or translation**. Those fields value **cultural knowledge and bilingualism** a lot.
