

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Croatia. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing that! Since you're 16 and just finished primary school in Denmark, you're now at a key decision point. In Denmark, there are several educational paths available after the **Folkeskole**, and the right one depends on your **interests**, **strengths**, and **future goals**. Here's a breakdown to help you think it through:

1. Gymnasiale uddannelser (Upper Secondary Education)

This path is great if you think you might want to go to university later.

Options:

- **STX (Alment gymnasium)** – Focuses on general academic subjects like humanities, social science, and natural science.
- **HHX (Højere handelseksamen)** – Business-focused; great if you're into economics, marketing, or entrepreneurship.
- **HTX (Højere teknisk eksamen)** – Focuses on technology, natural sciences, and technical subjects.
- **HF (Højere forberedelseksamen)** – A shorter (2-year) version of STX for more mature students or those who want a quicker path to higher education.

Best for you if: You enjoy academic subjects and want to keep your options open for university.

2. Erhvervsuddannelser (Vocational Education & Training - EUD)

This path prepares you for a skilled trade or job right after school. It combines school and hands-on work.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Chef

- Mechanic
- IT supporter

There's also **EUX**, which lets you combine vocational training with academic courses – so you can work in a trade or later apply for university.

Best for you if: You like practical work or want to earn money sooner and maybe start your own business one day.

Some things to ask yourself:

- Do you enjoy hands-on learning or prefer academic study?
- Do you want to go to university one day?
- Are you passionate about a certain field (e.g. technology, business, creative arts)?
- Would you like to start working earlier and earn a salary while you study?

A few personal suggestions based on what you shared:

- If you're curious, academically inclined, and want flexibility later: **STX** or **EUX** are great choices.
- If you enjoy technology or engineering: **HTX** is a strong path.
- If you're business-minded or entrepreneurial (maybe influenced by your family's background): **HHX** or **EUX Business** might suit you.
- If you like working with your hands or want a clear path to a job: **EUD** or **EUX** with a trade.

Also: your multicultural background is a strength!

Speaking Danish fluently and having Croatian roots can open doors in **international business**, **languages**, **translation**, **diplomacy**, or **global tech** roles – especially in the EU.

Would you like help deciding between specific schools near you, or suggestions based on your hobbies or favorite subjects?
