

Uddannelsesmuligheder efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cyprus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

It's great that you're thinking carefully about your next step — and you have a strong foundation with your language skills, cultural background, and education in Denmark! Let's break it down to help you consider your options.

🎓 Educational options after primary school in Denmark

Since you're 16 and have completed primary school (folkeskole), you typically have these main options:

1 Gymnasiale uddannelser (Upper secondary education, general)

- **STX (Almen studentereksamen):** Broad academic focus, good if you want to keep your options open for university.
- **HHX (Højere handelseksamen):** Focus on business, economics, marketing — good if you're interested in commerce or entrepreneurship.
- **HTX (Højere teknisk eksamen):** Focus on technology, natural sciences, and technical subjects — great if you're into engineering, IT, science.
- **HF (Højere forberedelseseksamen):** Shorter, 2-year program, more practical/theory mix, often for those who want to get to higher education faster or need a fresh start.

2 Erhvervsuddannelser (Vocational education and training, EUD)

- Apprenticeship-style programs where you combine school with practical training in a trade (e.g., electrician, carpenter, chef, hairdresser).
- Good if you prefer learning by doing and want to enter the workforce earlier.

3 Kombinerede forløb

- **EUX:** A combination of vocational education and upper secondary exam, letting you both learn a trade *and* qualify for higher education.

🌟 What path might suit you?

- ✓ **If you like academic subjects and want to keep doors open for university** → STX, HHX, or HTX
- ✓ **If you are interested in practical skills, entrepreneurship, or want a faster route to a career** → EUD or EUX

✓ If you want a shorter, more practical upper secondary path with the possibility to go to university afterwards → HF

Additional factors for you to consider

- Since you have a multicultural background, maybe you want to study subjects like languages, international business, or technology that could connect Denmark and Cyprus.
 - If you're unsure, you can also visit *UddannelsesGuiden* (ug.dk), or talk to an educational counselor (vejleder) at *Ungdommens Uddannelsesvejledning* (UU).
 - You could also consider taking a *10th grade* year if you want to strengthen skills or explore more options.
-

My recommendation

Since you're fluent in Danish, have completed folkeskole, and are considering your options:

- If you enjoy school and want a broad education: **STX**
 - If you're curious about business or international trade: **HHX**
 - If you like tech or science: **HTX**
 - If you prefer hands-on work and an earlier start in a trade: **EUD or EUX**
-

If you tell me more about your interests (e.g., do you like science, business, arts, working with your hands?) I can give you a more tailored suggestion! Would you like to share that? 😊
