

Uddannelsesvalg efter folkeskole

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Cyprus. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful and important decision you're facing — I'm happy to help you think it through! Since you're in Denmark, just finished primary school (so you've completed **folkeskole**), and you're fluent in Danish, here are your main options for what comes next, along with some guidance to help you choose:

1 Gymnasiale uddannelser (General Upper Secondary Education)

These are academic programs that prepare you for higher education (university).

- **STX (Studentereksamen)** – The most general and broad program, with a mix of humanities, sciences, social sciences.
- **HHX (Higher Commercial Examination)** – Focus on business, economics, marketing.
- **HTX (Higher Technical Examination)** – Emphasis on technology, natural sciences, engineering.
- **HF (Higher Preparatory Examination)** – A shorter 2-year program (for students who want a more practical, flexible way to qualify for higher education).

Recommended if:

You're interested in university studies later (bachelor's, master's), and you enjoy academic subjects (e.g. science, languages, social studies).

2 Erhvervsuddannelser (Vocational Education and Training – EUD)

These combine school with apprenticeship/work and lead directly to skilled jobs (or can also give you access to further studies).

Examples:

- Electrician
- Carpenter
- Chef
- Hairdresser
- IT-supporter
- Healthcare assistant

✅ Recommended if:

You prefer hands-on learning, want to start working sooner, or have a specific trade or profession in mind.

EUX

A mix of vocational training and general upper secondary education. You get both a vocational qualification **and** a studentereksamen level diploma, so you can both work in a trade or go to university.

✅ Recommended if:

You want to keep doors open for both working in a trade and going to university later.

✨ How to decide?

Here are some questions to ask yourself:

- Do you enjoy academic subjects like math, languages, science, or social studies? (→ **Gymnasiale uddannelser**)
 - Do you prefer learning by doing, and can you see yourself working in a specific profession? (→ **EUD or EUX**)
 - Are you interested in business, technology, or engineering? (→ consider **HHX** or **HTX**)
 - Do you want to go to university later? (→ **STX, HHX, HTX, HF, or EUX**)
-

Extra tip for you

Since you have roots in Cyprus and Denmark, you might think about international opportunities:

- Choose programs that offer languages (e.g. STX with languages focus) or international business (HHX).
 - Consider exchange programs or study options that could connect to both your Danish and Cypriot identity.
-

If you want, I can help you:

- ✅ Explore specific schools or programs near where you live.
- ✅ Make a list of pros/cons for each path based on your interests.
- ✅ Draft a plan for what to do next (e.g., visiting schools, talking to counselors).

Would you like help with that? 😊
