

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Côte d'Ivoire. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in Danish.

What educational path would you recommend for me?

Thank you for sharing a bit about yourself — that helps me give a more thoughtful recommendation! Since you're 16, fluent in Danish, and have completed primary school in Denmark, you're at an important decision point in the Danish educational system. Let's break down your options and things to consider:

Typical educational paths after primary school in Denmark

In Denmark, after *folkeskole* (primary and lower secondary school), most students choose between two main tracks depending on their interests and goals:

General upper secondary education (Gymnasiale uddannelser)

These are academic programs that prepare you for university and higher education:

- **STX (Studentereksamen):** A broad, general education with a mix of humanities, sciences, and social sciences.
- **HHX (Higher Commercial Examination):** Focuses on business, economics, and international trade.
- **HTX (Higher Technical Examination):** Focuses on technology, natural sciences, and innovation.
- **HF (Higher Preparatory Examination):** A shorter, 2-year academic program, often for students who want flexibility or a different environment.

 Choose this path if:

- You want to go to university or higher education later.
- You enjoy academic subjects like science, languages, business, or technology.
- You want to keep your options open for future studies.

Vocational education and training (Erhvervsuddannelser, EUD)

These programs combine school with apprenticeships in a company. Examples include:

- Carpenter, electrician, chef, graphic designer, healthcare worker, etc.

 Choose this path if:

- You prefer practical, hands-on learning.
 - You want to work and earn while you learn.
 - You want to qualify for a specific profession quickly.
-

✨ What to think about when deciding

Here are some good questions to ask yourself:

- Do I enjoy studying theoretical subjects, or do I prefer practical work?
 - Do I see myself going to university? Or would I rather start working sooner?
 - What subjects am I passionate about — languages, business, science, art, technology?
 - What kind of work-life do I imagine: office, workshop, lab, company, own business?
-

🌍 Special considerations in your case

Since you have multicultural roots (Danish + Ivorian background), you might also think about:

- Taking advantage of your cultural knowledge and potentially learning or improving French, which could open up opportunities in international business, diplomacy, or NGOs.
 - Looking into exchange programs or international education tracks.
-

🎯 My recommendation

👉 Since you're still exploring your interests, **STX or HHX could be great choices** — they give you a broad education, keep many doors open, and allow you to find out what you're passionate about. If you like science or tech, HTX could be excellent.

👉 If you already feel sure about a specific trade or career, EUD is a fantastic, respected path with great job opportunities.

⚡ Next steps

- ✓ Visit *ungdomsuddannelse* open houses (Åbent Hus) to get a feel for the schools.
 - ✓ Talk to a guidance counselor (*UU-vejleder*) — they can help match your interests to programs.
 - ✓ Try out a short internship (*praktik*) or a trial course (*brobygning*) if possible.
-

If you want, tell me about your interests — I can help you match them to specific programs! 😊
