

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Côte d'Ivoire. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a thoughtful question, and it's great that you're already considering your next steps! In Denmark, after primary school (folkeskole), you typically choose between several educational paths depending on your interests, strengths, and future goals. Since you're 16, I'll outline some options and provide recommendations based on different interests:

General upper secondary education (Gymnasiale uddannelser)

If you enjoy academic subjects and might want to attend university later, consider one of these:

- **STX (Almen studentereksamen)** – A broad, academic education with focus on subjects like humanities, social sciences, and natural sciences.
- **HHX (Højere handelseksamen)** – Focuses on business, economics, and international trade.
- **HTX (Højere teknisk eksamen)** – Focuses on technology, science, and IT.
- **HF (Højere forberedelseseksamen)** – A shorter, 2-year program that prepares for higher education (more common if you want a slightly shorter and more practical academic route).

Recommended if:

- You enjoy studying subjects like math, languages, science, or business.
- You want the option of university or higher education later.

Vocational education and training (Erhvervsuddannelser/EUD)

If you're interested in practical, hands-on work and want to move faster into the job market:

- Options include becoming a carpenter, electrician, chef, healthcare worker, IT technician, etc.
- Many vocational educations combine school with apprenticeship (praktik) at a workplace.

Recommended if:

- You prefer learning by doing rather than sitting in a classroom.
- You want a skilled trade and to start working sooner.

Other paths

- **Kombineret ungdomsuddannelse (KUU)** – If you need a more flexible or supportive path to get into work or further education.
- **International opportunities** – Given your background and language skills, you might consider programs with an international focus, e.g. international STX or IB (International Baccalaureate).

☀ Things to think about

- What subjects do you enjoy the most?
- Do you like working with people, ideas, technology, or your hands?
- Do you see yourself going to university or starting a job earlier?
- Would you like a school environment or more work-based learning?

💡 My recommendation (based on what you've shared)

Since you're fluent in Danish, have grown up in Denmark, and just finished primary school, I would suggest:

➡ **STX or HHX** if you want to keep your options open for university, possibly combining Danish and international focus (especially with your Côte d'Ivoire heritage, you could build on your cultural and language strengths).

➡ **HTX** if you like technology, science, or engineering.

➡ **EUD** if you know you want to work in a skilled trade or technical field soon.

If you tell me more about:

- What subjects you like best,
- Whether you want to go to university,
- And what kind of job you dream of,

I can give you a more tailored recommendation! Would you like help figuring that out? 😊
