

Uddannelsesvalg i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from Democratic People's Republic of Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish. What educational path would you recommend for me?

Thanks for sharing your background—it's great that you're thinking seriously about your next steps. Since you've just finished **primary school in Denmark** (which typically ends at 9th or 10th grade), your next step will usually be to choose a **youth education program (ungdomsuddannelse)**. Here's a clear breakdown of your options and some guidance based on your situation:

🎓 Main Educational Paths After Primary School in Denmark

1. General Upper Secondary Education (Gymnasiale uddannelser)

These prepare you for university. There are a few types:

- **STX** (Studentereksamen) – Focus on humanities, social sciences, and natural sciences.
- **HHX** (Higher Commercial Examination) – Focus on business, economics, and international trade.
- **HTX** (Higher Technical Examination) – Focus on science and technology.
- **HF** (Higher Preparatory Examination) – A 2-year general program (often for older or more practically-minded students).

✅ Best if you want to go to university or have a wide range of interests.

2. Vocational Education and Training (EUD)

These combine **school and practical training** (apprenticeships). After 2–5 years, you'll be ready to work or go on to further education.

Examples:

- Electrician
- Carpenter
- Hairdresser
- Social and health care assistant

✅ Great if you enjoy **practical work** and want to enter the job market with strong skills.

3. Kombinerede forløb (EUX)

A mix of vocational training (EUD) and general upper secondary (like STX). You learn a trade **and** get a qualification for university.

✓ Ideal if you want **hands-on skills + the option for higher education**.

How to Choose?

Ask yourself:

- Do I like studying academic subjects like math, languages, history? → **STX or HHX**
- Do I like working with my hands, making things, or helping people directly? → **EUD or EUX**
- Am I curious about business or international issues (especially useful if you speak more than one language)? → **HHX**
- Do I want the flexibility to go to university but also build a career quickly? → **EUX**

Recommendations Based on You:

Since you're fluent in Danish, born and raised in Denmark, and have a multicultural background, here are a few personalized suggestions:

1. **HHX** – Might be a great match if you're interested in **business, international trade, or economics**, especially since Denmark has strong ties with international companies. Your background could give you a unique perspective.
2. **STX** – A solid, general choice if you're unsure. It opens the most doors for future education.
3. **EUX** – Strong if you want both practical skills **and** the chance to go to university later.

Final Tips

- **Visit open houses** at local gymnasiums and vocational schools.
- Talk to your school's **UU-vejleder (youth guidance counselor)**.
- Ask your parents or trusted adults about what you're good at and enjoy doing.
- Remember, **you're not locked in forever**. Many people change paths later.

Would you like help making a **comparison chart** or suggestions based on specific **interests or career ideas** you have?
