

Uddannelsesmuligheder i Danmark

I'm a 16 year old person living in Denmark. I'm born in Denmark, but my parents are from North Korea. I just finished primary school in Denmark and am now considering what my next step should be. I'm fluent in danish.

What educational path would you recommend for me?

That's a great and thoughtful question — and it's wonderful that you're reflecting carefully on your next steps! Let's break it down so I can give you helpful guidance.

Your background

- You're 16, just finished primary school in Denmark (I'm guessing this means *folkeskole* or equivalent).
- You're fluent in Danish.
- You have a multicultural background (Danish + North Korean heritage).

Your options in Denmark after primary school

After *folkeskole*, students in Denmark typically choose between:

1 Gymnasiale uddannelser (Upper secondary school / high school)

These are academically oriented and prepare you for university. Main types:

- **STX** (*studentereksamen*): General academic upper secondary education with broad subjects (science, languages, social science, arts).
- **HHX** (*højere handelseksamen*): Focus on business, economics, marketing.
- **HTX** (*højere teknisk eksamen*): Focus on technology, science, engineering.
- **HF** (*højere forberedelseksamen*): Shorter, 2-year academic program, often for students who want flexibility or had a break.

2 Erhvervsuddannelser (Vocational education and training - EUD)

Combines school + apprenticeship/job training. Leads to skilled trades: carpenter, chef, electrician, etc. Can later continue to higher education.

3 Kombinerede veje (eux)

Vocational + academic combined — gives both a trade qualification and access to university.

What's best for you?

 The best choice depends on:

- **Your interests:** Do you enjoy academic study? Practical work? Creative fields? Technology?

- **Your future goals:** Do you want to go to university? Work in a trade? Start earning soon?
- **Your strengths:** Are you stronger in languages, math, science, arts, working with hands, social skills?

Some ideas based on your situation

Since you're fluent in Danish and grew up in Denmark:

- You have full access to all educational paths — so focus on your interests!
- Your multicultural background could be an advantage in international business (HHX), languages (STX), diplomacy, or social sciences.
- If you like tech, HTX could be a strong choice.
- If you want to work with your hands or get a job faster, vocational education (EUD or EUX) could suit you.

What I recommend

If you're unsure right now:

STX is the broadest and keeps most doors open for future university or professional studies.

If you like business/economics:

HHX could prepare you for international business, marketing, or finance.

If you like technology/science:

HTX could be a great fit — it's applied, with a focus on STEM.

If you prefer practical, hands-on learning:

Consider EUX (both trade and academic qualification) — very flexible and valued.

Next steps

 I recommend:

- Talk to your school's guidance counselor (*UU-vejleder*).
- Visit open house events at local gymnasiums and vocational schools.
- Try a "brobygning" or intro course to experience different paths before you choose.

 If you tell me more about what subjects or activities you enjoy, I can help you narrow down the best fit! Do you like languages, science, arts, social science, business, technology, or something else?
